

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

K.G., G.C.B., K.P., G.C.M.G.,

COLONEL OF THE ROYAL REGIMENT OF ARTILLERY.

PREFACE.

THE Committee of the Royal Artillery Institution, in publishing a revised edition of Kane's "List of Officers of the Regiment," have completed it to the present day.

This edition contains the Notes on Officers' Services compiled from various sources by the late General W. H. Askwith, Colonel-Commandant Royal Artillery. Opposite each page of the original Kane's List is inserted a new page, bearing the same number as the original, with a distinguishing mark, thus—[1] and [1A]. General Askwith's notes are entered on the new page.

The Committee are unable to carry out a suggestion that, in this edition, lists should be published showing the relationships of officers who have served in the Royal Artillery; they wish it to be known that lists of similarly named officers, showing such relationships as can be discovered, are kept by the Secretary R.A. Institution, and are available for reference, additions, or corrections, at any time.

Further additions have been made to the short biographies of some of the more distinguished Officers.

(ORIGINAL EDITION).

IT was at first intended to have begun the *List of Officers*, when General Borgard was Colonel Commandant of the Corps ;—but that was found to be impracticable, from the want of Official Documents, there being no Lists in any of the Adjutant's Offices of the Senior Battalions, of a later date than the year 1773.

The names of the Officers of the Regiment, as they stood at certain periods, long previous to the Year 1763, can be obtained from various channels ; but the dates of their promotions, retirements, and casualties, cannot be ascertained.

The following List commences with the names of the Officers in the order they stood in the Army List for 1763, with the exception of some Officers who afterwards obtained precedence of others, in consequence of Commissions which had been granted by Lord Albemarle at the Havannah, and which were confirmed by the King ;—and of some who had been invalided, but were still kept on the *Effective List*, there being no Invalid Companies until the year 1771.

Several Officers to whom Commissions had been granted by the Earl of Loudon, in Portugal, by Sir Jeffery Amherst, in North America, and by Majors Hislop and Maitland, in the East Indies, are also inserted, their Names being found either in the Army List for 1763, or the subsequent ones. The Officers who were incorporated from the Royal Irish Artillery, in the Year 1801, are inserted in the List, according to the dates of their first commissions, by which they take their future promotion in the Regiment.

The columns being so numerous, it was found inconvenient to distinguish the promotions of First Lieutenant Colonel, and First Major ;—and as those distinctions were not of

long continuance, and gave no Army Rank, it is hoped the omission will not be considered material. From the frequent removals of Officers of the Invalid Battalion to the *Seconde List*, and vice versa, it would have very much lengthened the Remarks to have inserted the dates of them all ;—all Officers, therefore, who retired to the Invalids, whether they were borne upon the Establishment of the Battalion, or upon the *Seconde List*, are inserted from the dates of their retirement.

A very material alteration having taken place in the distribution of crosses and medals, since the List was sent to Press, a separate Table is given of these honorary distinctions, as far as could be ascertained ; this List also contains the names of those Officers who have received Brevet Rank, out of the regular course of Army promotion ; with the names of the Officers who have been appointed Knights Commanders of the most honourable Military Order of the Bath.

The following Lists are intended solely for the Officers of the Regiment, and the Corps connected with it ; and the Compiler hopes they will meet with their approbation. By means of them, every Gentleman who chuses, may, with the least possible trouble, keep always a correct List of the Officers of the Regiment, &c., by him ;—it requires only occasionally the insertion of a few dates, adding names when Gentlemen Cadets are appointed to Second Lieutenancies, and marking off such Officers as may leave the Regiment.—The drawing a black line from the last promotion, indicates, with sufficient clearness, that the Officer is no longer in the Regiment, so that the name may either be struck out with a pen, or not, at the pleasure of the person who makes the alteration.

* Until 1751 the Quartermastership was held by an officer of the substantive rank of 2nd or 1st Lieutenant, or Capt.-Lieut., until promotion to a Company (Captain), with extra pay and allowances; but about 1741 began the practice of buying and selling this (then) lucrative appointment, which culminated in the last incumbent paying £700 for it. The Board of Ordnance abolished purchase by order of 24 Feb. 1783, and ruled that in any future vacancy "some meritorious N.C.O. should be recommended for the same" (*Trade "History of R.A."* (Duncan), vol. ii., p. 25). The first vacancy occurred in March, 1793.

Until the Board of Ordnance was abolished, in 1854, Quarter-Masters, R.A., retired on half-pay or full pay (according to service), and three G.S. Rewards of £60 + £50 + £50 were allotted to the 12 Quarter-Masters. Under War Office, retired full pay has ceased; and G.S. Rewards shared between District Officers, Quarter-Masters, and Riding-Masters, indifferently.

NOTE.—These Officers were included on the establishment of the Royal Artillery until the year 1801, when they were formed into a separate establishment entitled the "Medical Establishment for the Military and Civil Departments of the Ordnance." This department was on the 26th December, 1833, merged into the "Army and Ordnance Medical Department," and when the Board of Ordnance was abolished, the title of "Army Medical Department" was retained for the whole body, and gentlemen appointed to the Royal Artillery were gazetted as such, and their names appended to the list of the Regiment in the Army List. Until the year 1854 the Medical Officers held only warrants from the Master General of the Ordnance; after that period, all the different ranks held commissions from the Crown, excepting the Supernumerary, Extra, and Temporary Assistant Surgeons.

By a Warrant of March 1873 abolished the regimental system, and placed all Medical Officers in one Staff or Department.

- These Brigades are from the late East India Company's Service, and are composed of both Field and Garrison Batteries.
- † The remaining Rocket Troop of H.A. was in 1847 amalgamated with the Horse Brigade and designated "1" Troop
- ‡ Two of these Batteries belong to the Horse Brigade Depot.

1879. Re-organization into Brigades abolished Battalion system, and gave R.A. 4 Horse Brigades, 8 Field and 8 Garrison Brigades, 3 Depot for R.A., and 3 Brigades of Coast Artillery. G.O. 14, 1879.
 1880. Amalgamation of Artillery of H.E.I.C. with R.A. brought in some reserve officers and men; and subsequent re-organization gave R.A. 3 Brigades R.H.A., 3 Depot R.H.A., 10 Field Brigades, 10 Garrison Brigades, and 3 Depot R.A. G.O. 14, 1880.
 1881. Re-organization followed as detailed up administrative material units in Brigades, with redistribution of increased Batteries per unit. R.H.A. became reduced to 3 Brigades, Field and Garrison Artillery to 8 each. The larger regiments formed the nucleus of the 1881 units. G.O. 14, 1881. R.O. 14, 1881.

Two Field and 5 Garrison Batteries Formed.
Re-organization 1 July 1889.

* The term "Brigade" discontinued 1 July 1889.

† These numbers are exclusive of the Riding Establishment, Emergency Detachments for St. Helena and Sierra Leone, and the R.A. Regimental District Staff.

NOTE.—The 1882 re-organization involved reduction of R. H. A. Brigades to 2, Field Artillery to 4, with re-distribution of Service Batteries into tactical units of 2 or 3 grouped under Lieut.-Colonels. Field Artillery Depôts were abolished, Field Artillery recruits being trained at territorial centres. The Garrison Artillery was territorialized into 11 Divisions, with changes of designation of 107 Batteries—each Garrison Division being given a Depôt. R.O. 26, 3, 1882.

In 1874 Field Artillery Depôts were revived. R.O. 1, 1884.

In 1889 re-organization abolished the Brigade system for R. H. A. and Field Artillery, Mounted Batteries, F. A. being numbered consecutively. Mountain Artillery was created as an independent unit. Garrison Artillery became doubled up into 3 large groups or Divisions—thus virtually abolishing the territorial system. R.O. 80, 1889.

The 1891 re-organization was confined to Garrison Artillery, Batteries being designated Companies, and doubled up into "Double Companies." For district local permanent requirements specialists were appointed; and the Coast Brigade was replaced by 12 local establishments locally at home and abroad. R.O. 76, 1891.

In 1894 the Double Company system was abolished, and Garrison Artillery reverted to the *status quo ante* of 1871 with exception of retention of designation of "Company." R.O. 34, 1894.

In 1895 R. H. A. obtained 1 additional Service Battery, with loss of 1 R. H. A. Depôt. Field Artillery obtained 7 additional Service Batteries, but lost 3 Depôt Batteries. Garrison Artillery obtained 6 additional Service Companies, with loss of 3 sub-depôts.

The foregoing do not, of course, take into consideration the re-organization of armaments and equipments.—Ed.

CHANGES IN THE ROYAL ARTILLERY.

BY

MAJOR AND QUARTERMASTER R. H. MURDOCH, R.A.

(Late Assistant Superintendent R.A. Records.)

THE chart bearing the above designation having been revised to date, the following brief explanatory summary may fittingly find place in the present edition.

This chronological chart was designed to show the various changes of nomenclature through which each segment of the corps has passed, and at a glance the history of every battery now existing, as well as of others now extinct, all traced back to their origin; and, as a means of cultivating and cementing the solidarity which is the merit of any regimental system, this register may be found useful or acceptable to the branches of our corps which are in various ways (by a chain of dates collected and pieced together) linked with the early ancestry of the Royal Regiment of Artillery, and associated with its ancient glories.

When making this compilation the basis taken was the usually accepted germ of the regiment, the "Train of Artillery" formed in 1705, this having been the first "trayne" which obtained permanence subsequent to the original trayne, with leather guns, of Henry IV., all other trains having been disbanded when the occasion which created them ceased.

There were, in 1705, three companies of the "Train of Artillery," with two added in the same year (making a total of some 300 officers and men), and the chart traces the development of this germ into the 225 batteries of some 35,000 officers and men in 1859, excluding the District Establishments. At the latest re-organization these five patriarchal batteries became distributed as follows:—The two seniors to the Field Artillery, the third to the Mountain Artillery, and the fourth and fifth to the Western and Eastern Divisions of the Garrison Artillery. The premier battery of the Royal Artillery is the 1st Field Battery, at present commanded by Major C. D. King, at Ahmadnagar.

In 1757 began that series of re-organizations—to adjust, in terms of biological formule, "its internal to external relations"—which has characterized the scientific arm to this day, and the designations of units were changed into "companies of battalions" of Royal Artillery, the 1st Company 1st Battalion R.A. being the present 1st Field Battery, R.A. The Peninsula Campaigns brought into existence the mobile "troops" of Royal Horse Artillery, the oldest of which is shown to have been raised in 1793—now known as "A" Battery, Royal Horse Artillery, commanded by Major E. A. Burrows, at Meerut, East India. In 1801 the Act of Union incorporated the Royal Irish Artillery with the Royal Artillery, under the designation of "7th Battalion," the oldest company of which was raised in 1756, and is now the 3rd Field Battery, R.A., commanded by Major A. Capel-Cure.

Coming down to more recent times, it will be observed that from the commencement of the Crimean War until the re-organisation of 1859, certain companies were distinguished by the additional designation of a letter or number, thus:—

1803.—8th Battalion, 2 Company, "A" Battery (then commanded by Captain A. C. Mercer) indicates that this was a Field Battery throughout the period (1854–59). At that time it was spoken of as "A" Battery, or as Mercer's Company, rarely as No. 2 Co., 8th Battalion. The explanation of this is that, from the reductions of 1816 until 1st April, 1859, there were not any standing or permanent Field Batteries of Royal Artillery. At certain places (Woolwich, Ireland, Leith, etc.) a few field guns and howitzers, with and without permanent horses, were kept for

instructional purposes; and on return from foreign service a company would "go into Field Battery" for about two years, and then revert to dismounted or garrison duty. The companies which embarked for the Crimea, China War, and Indian Mutiny as Field Batteries were given, each, the distinctive letter or numerical battery designation—which lapsed at the creation, in 1859, of permanent Field Artillery Batteries and Brigades. In that year (1859) the climax of artillery organization was reached in the sweeping transformation of "companies" and "battalions" into "batteries" and "brigades," which intensified *esprit de corps* into vital *esprit de brigade*, and raised the mounted branches to the high mobility and efficiency which they have since maintained. And when, in 1862, the Bengal, Bombay, and Madras Artilleries of the late Honourable East India Company welded the whole force into a *corps d'armée* of 35,000 officers and men, the Royal Artillery attained the summit of its strength.

The artillery of the East India Company was not a foreign body * grafted on to the Royal Artillery stem in 1862, but was, or had been, bone of our bone, and flesh of our flesh; or might more aptly be compared to a prodigal son who, after having gone to a far country, and there lived prodigally and gone through much hard service, returned to the parental home, for in and after 1718 some eleven or twelve companies of the Royal Artillery were sent out from England to the Indian Presidencies as nuclei on transfer to the service of the H.E.I. Co., and, with but one exception, were not relieved until the amalgamation of 1st May, 1862.† The chart shows date of origin, and the particular designation of each in 1862, but is incomplete in not distinguishing the various *ad interim* changes in designations of the troops and companies derived from England, nor of all the companies, etc., formed in India by the H.E.I. Co. I have for years been gathering scattered links of this broken chain, and am sanguine of being enabled some day to repair and replace them.‡

The "territorial" localization scheme of army re-organization fell with greatest force, in 1882, upon the permanent artillery in garrisons, and 107 batteries changed designations from batteries of brigades into batteries of territorial "divisions," varying as the points of the compass, such as Northern, Eastern, Southern, Western, London, North Irish, Scottish, etc., while, owing to the adaptability of the Horse and Field Artillery, these batteries are shown to have adjusted themselves to the altered environments without any change of designation. It may be noted that the battery of Royal Artillery subjected to the largest number of changes of nomenclature is the present No. 16 Battery, Western Division R.A., which, although formed only in 1845, as "B" Company, 4th Madras Artillery, has passed during the last twenty-eight years through ten crucial changes:—It became the 6th Battery, 17th Battalion (Garrison) in 1862; F. 17th Brigade (Field), 1862; 7 23rd (Garrison), 1863; G 23rd (Field), 1863; 7 23rd (Garrison), 1865; 5 23rd (Garrison), 1868; 7 6th (Garrison), 1871; 2 9th (Garrison), 1877; No. 2 Battery, Welsh Brigade (Garrison), 1882; and No. 16 Battery, Western Division R.A., in 1889.

In like manner each battery is now enabled to trace the several mutations through which it has passed, and to build up for itself a record of services in which it has hitherto had but a vague and general, instead of an individual, share.

* The same applies to the Royal Irish Artillery, which returned to the Royal Artillery, as the 7th battalion in 1801.

† Amalgamation took place (politically) in 1859, and was promulgated in India by General Order, Queen's troops, 14th October, 1861; but the amalgamated artilleries were first borne on Imperial Estimates and Returns in 1862, per R.A.R.O. 460 of 19.2.1862.

‡ The Bengal Artillery links are completed in the present edition: those of Bombay and Madras are still incomplete. The Editor is grateful for assistance from Major-General F. W. Stubbs, of late Bengal Artillery, and Major G. E. W. Malet, late R.H.A.

ON THE DRESS

OF THE

ROYAL ARTILLERY AT VARIOUS PERIODS.

1730. There are two portraits extant of Officers of Train of Artillery when first Regimented, viz.: of Major-General Albert Borgard, and of Lieut.-Colonel Jonas Watson, both about the date 1730. These Officers are represented in half-armour, wearing the breast-plate, which was not entirely discontinued, even to the time of George III., who, in his first coinage, also wears a breast-plate.

1743. The uniform dress of Officers was a plain blue coat, lined with scarlet, a large scarlet Argyle cuff, double breasted, and with yellow buttons to the bottom of the skirts. Scarlet waistcoat and breeches, the waistcoat trimmed with broad gold lace, and a gold laced hat. The Sergeants' coats were trimmed—the lappels, cuffs, and pockets, with a single broad gold lace: the Corporals and Bombardiers with a single narrow gold lace. The Gunners and Mattrosses plain blue coats: all the N.C. Officers and Privates having scarlet half-lappels, scarlet cuffs, and slashed sleeves with five buttons, and blue waistcoats and breeches: the Sergeants' hats trimmed with a broad, and the other N.C. Officers and Privates with a narrow gold lace. White spatterdashes were then worn. The Regimental clothing was delivered to the N.C. Officers and Men once a year, except the coats which they received every second year, and the intermediate year a coarse blue surtout, which served for laboratory work, cooking, fatigues, &c., and was delivered with the usual smaller necessities. The arms of the Officers were fuseses without bayonets, and not uniform. The Sergeants, Corporals, and Bombardiers, were armed with halberts, and long brass hilted swords. The Gunners carried field staffs about 2-ft. shorter* than a halbert, with two linstock locks branching out from the head, and a spear point projecting between and beyond them. Great attention was paid to keeping these very bright. A buff belt over the left shoulder, slinging a large powder horn mounted in brass over the right pocket, and the same long brass hilted swords as worn by N.C. Officers. The Mattrosses had only common muskets (flint lock) with bayonets and cartouche boxes.

1748. Before the Army took the field this year, the Gunners' field staves, powder horns with slings, and swords, and the Mattrosses' muskets were laid aside, and both these ranks were armed with carbines and bayonets: all the N.C. Officers continued to carry halberts.

* In the original "longer," but this seems a clerical error. It would have made them 9 or 10-ft. long.

1749. March 27. Garrison Order by Colonel Belford:—"That the Captains provide their Men with one pair of white stockings each, in which they are to parade at all times when not under arms."

April 3. "That the N.C. Officers and Men are to be forthwith provided with one good pair of white spatterdashes, with black buttons, also with one pair of black spatterdashes, and a rose to their hair, 'the same as we had in Flanders.'" This was the first time black spatterdashes were worn in the Army.

1750. The Regimentals of the N.C. Officers and Men underwent an alteration. The Sergeants' coats were laced round the button holes with gold looping. other N.C. Officers and men with yellow worsted. The Corporals and Bombardiers had gold and worsted shoulder knots. The **surtouts** were laid aside, and complete snits of clothing were delivered every year. From this time to 1802 the Sergeants were distinguished by two gold lace shoulder knots, a Corporal by two of worsted, and a Bombardier by one, afterwards by chevrons, as at present.

Garrison Order by Colonel Belford:—"Officers are, for the future, to mount guard in their Regimentals, with their fusees and cartouch boxes."

1751. April 5. Garrison Order by Colonel Belford:—"Officers, when on duty, are to wear the knots of their sashes in their left pocket, with the fringe hanging out."

1754. Halberts were taken from the Corporals and Bombardiers, and they fell into the ranks with carbines.

Officers, Gunners, and Private Men's hair be plaited and turned up behind with a black ribbon or tape, three-quarters of a yard long in a bow at the tye. SHORT BIOGRAPHIES

SOME OF THE MORE DISTINGUISHED OFFICERS.

[The marginal numbers refer to the dates of each officer's entry in the Regimental List].

1 LIEUT.-GENERAL ALBERT BORGARD was of an ancient family in Denmark, and began his military career in the year 1676, in the army of his sovereign, at that time at war with Sweden.

After eight years' study of the art of war, during which he had much practical experience, he appears to have been the life of a soldier of fortune, serving as a volunteer alternately with the armies of Denmark, Hungary, Prussia, and France, and was present in all the important actions engaged in by those nations during the nine years he was thus employed.

In the year 1692, being then 33 years of age, King William III. induced him to transfer his services to Great Britain; at that time a veteran of eleven engagements and of twelve sieges. A few years later he was employed in the organization of the Royal Regiment of Artillery, of which he was the first Colonel Commandant; in this capacity he revised the artillery *matériel* of the day, and the elaborate MS. tables, which are still extant, attest the care with which this duty was performed. The regulations he framed for the construction of guns and carriages, the proof of guns and small arms, &c., appear to have come into force at different periods from 1718 to 1725.

This distinguished officer saw much active service in the wars of King William and Queen Anne in Flanders, Spain, and Minorca.

He was personally engaged during this period in seven battles and twelve sieges; at length, covered with wounds, he finished a life full of years and honours on the 7th February, 1751, at the age of 92.

The officers of the Royal Artillery, from the great respect they entertained for his distinguished valour and abilities, caused his portrait, taken from an original painting, to be placed in the Royal Military Repository in 1785. This picture is now in the Royal Artillery Mess Room at Woolwich.

Commissions and appointments held by Lieut.-General Borgard:—

- Firemaster (Artillery) 1693, signed by Lord Sidney.
- Captain and Adjutant (Artillery), 1695, signed by Lord Romney.
- Engineer, 27 Mar., 1698, signed by Lord Romney.
- Commander of Allied Artillery in Spain and Portugal, 1703.
- Chief Firemaster of England, 9 Aug., 1712, signed by Lord Rivers.

Assistant Master of Ordnance, 25 Apr., 1718, signed by Lord Rivers.

Major-General, 1 Mar. 1726, signed by George I.

A full-length portrait of this distinguished officer, with a portrait of his wife, published at Copenhagen, in Denmark, by Captain O. N. Olsen, in 1849.

LIEUT.-COLONEL JONAS WATSON served in Flanders under the Duke of Marlborough; commanded the Artillery at the defence of Gibraltar in 1727, and at the capture of Carthage, in 1741.

31 **LIEUT.-GENERAL GEORGE WILLIAMSON** commanded the Royal Artillery at the siege and capture of Louisburg in 1758, and during the operations in North America, terminating with the capture of Montreal in 1760, when Canada was ceded to the British.

34 **GENERAL WILLIAM BELFORD** served at Carthagen 1741, in Flanders (including the battle of Dettingen), 1743-5, and received a brevet majority after this battle, commanded the Royal Artillery at the battle of Culloden, after which he was made a brevet Lieut.-Colonel, where "by his spirit and boldness he checked the vigour of the clans and gave the victory."^{*}

Commanded the Royal Artillery in Flanders 1747-8. Was Commandant of Woolwich Garrison from 1751 to 1757. A document, headed 'Col. Belford's March of the Artillery,' will be found in Muller's Treatise, published in 1757, and preserves many curious details of the arrangements of the previous campaign in Flanders, 1747-8, in respect to the train of Artillery. When the allied army separated, Col. Belford brought over from Flanders a Hanoverian fifer, by name John Ulrich, who taught the fifers in the British service, established first in the Royal Artillery at the end of the war in 1748.

"The Regiment of Artillery owes much to the memory of Colonel William Belford and Major Borgard Michelson for their zeal and diligence, during the campaigns of 1747 and 1748, while they commanded in Flanders."[†]

51 **LIEUT.-GEN. THOMAS DESAGULIERS**, F.R.S., commanded Royal Artillery at the reduction of Belleisle, in 1761. A manuscript journal of that siege, attributed to him, is in the R.A. Library at Woolwich.

Was distinguished for his scientific attainments, particularly in the art of war. Anticipating Carnot,[‡] Colonel Desaguliers invented a method of throwing small shot to the number of 400 to 600 from mortars, to descend on the heads of troops. He also, when firemaster (before 1780) in the Royal Laboratory, made numerous experiments for the construction of rockets.

This talented Officer was the first artilleryman who had the honour of being elected a Fellow of the Royal Society; but his name is chiefly remembered for the superior refinement of the instruments he introduced for examining and verifying the bores of cannon. "Desaguliers' Instrument" remains to this day in use in the Royal Gun Factories.[§]

54 **LIEUT.-GEN. THOMAS ORD** commanded the first company of the Royal Artillery sent to America, which was almost annihilated at the battle near Fort du Quesne, 9th July, 1755. Previous to the capture of Quebec,

18th Sept., 1759, Major Ord was sent against Ticonderago and Crown Point with 111 of the R.A., part of the force under General Amherst. Was also at the taking of Martinique, on the 7th February, 1762.

GENERAL JAMES PATTISON commanded the companies of Royal Artillery sent to Portugal in 1762. Was sent to Venice in 1769, to superintend the organization of the Venetian Artillery. Commanded R.A. during the latter part of the American Revolutionary War, and was sometime Commandant of New York. Was twice Commandant of Woolwich Garrison, and was also Governor of the Royal Military Academy.

MAJOR-GENERAL THOMAS JAMES served on the coast of France, 1757. Commanded Royal Artillery during the early part of the American Revolutionary War. Was the author of the "Herculean Straits," one of the earliest works on Gibraltar.

LIEUT.-GEN. SAMUEL CLEAVELAND commanded Royal Artillery in America and the West Indies on many important occasions from 1759 to 1777, including the defence of Guadaloupe (1759), capture of the Havannah (after the death of Colonel Leith) 1762, Brandywine Creek, and several other important actions during the American Revolutionary War.

LIEUT.-GENERAL FORBES MACBEAN was at the battle of Fontenoy, in 1745. In June, 1746, he was attached to the army in Holland, and served in that country until the peace of Aix-la-Chapelle, in Nov., 1748. Was engaged at Rocour, 30th Sept., 1746, and at the battle of Laffeldt, 11th June, 1747. Capt. Macbean was ordered with his company to Germany, and commanded the heavy brigade of the British Artillery in 1759-60-61, rendering conspicuous services, especially at Minden, in August, 1759, Warberg, in July, 1760, and Fritzlar, in February, 1761.

Embarked for Portugal in 1762, and served with the *corps d'armée* commanded by the Count de la Lippe as Major of the Artillery in all the operations of that campaign.

In 1763 he was appointed Colonel of a regiment of Portuguese Artillery, and in 1765, Inspector-General of all the Portuguese Artillery. In 1778, commanded the Royal Artillery in Canada, and in 1780, when an invasion of that country was anticipated, commanded the left brigade, covering Sorel.

Colonel Forbes Macbean was elected a Fellow of the Royal Society in 1786. It is much to be regretted that there are no records of the later years of this distinguished officer.

MAJOR-GENERAL WILLIAM PHILLIPS was, when a very young officer, appointed to the command of a company of miners (attached to and forming part of the Royal Artillery), raised for service in Minorca in

1756. The capitulation of Port Mahon (Minorca), having rendered the services of the miners unnecessary, the company was established the following year, as one of the regiments of artillery, Phillips retaining the command (although he had never held the rank of Captain-Lieutenant), through the interest of Sir John Ligonier, Lieut.-Gen. of the Ordnance, to whom he had been aide-de-camp; this appointment naturally gave great annoyance to other officers before whom he had been preferred.

In 1758 he was sent to Germany in command of the British Artillery, attached to the army of H.S.H. Prince Ferdinand of Brunswick, a regular Brigade of Artillery consisting of three companies having been established. Commanded the Artillery at the battle of Minden in 1759, the batteries under him being commanded by Captains Macbean, Drummond, and Foy. These Officers were especially thanked and complimented by Prince Ferdinand in his general order the day after the battle, and as a testimony of his great satisfaction of their gallant behaviour, he presented Captain Phillips with 1000 crowns and the other Officers with 500 each.

At the action of Warberg, 30th July, 1760, the Marquis of Granby stated that the British Artillery, commanded by Captain Phillips, made such expedition that they were in line to second the attack in the most surprising manner, and the retreat of the French was attributed to the British cannon and dragoons.

Whilst in Germany, Phillips established the first band in the Royal Artillery.

In 1776, Lieut.-Colonel Phillips joined the army in America, under Lieut.-Generals Sir Guy Carleton and Burgoyne, and commanded the Artillery, consisting of six companies, at the engagement of Skenesborough, near Ticonderoga; and at the affair at Stillwater, near Saratoga, 19th September, 1777, and battle of Saratoga, 7th October, having been promoted to Major-General in August, while still but a regimental Major in the Artillery.

He conducted the retreat from Saratoga in October, 1777, and was the second senior at the Council of War on the 13th of that month, when Lieut.-General Burgoyne decided on surrendering to the Republican forces.

In 1781 Major-General Phillips having been exchanged for the American General Lincoln, joined the army at New York, and on the 20th March proceeded with 2,000 picked troops to Rhode Island, to prevent the French troops sailing for the Chesapeake, on which duty he was frequently engaged, both with the shipping and the enemy on shore.

Here, unfortunately, he contracted the disease which, too early for his country, cut short a career of the highest promise. He died at St. Petersburg, in Virginia, on the 13th May, 1781.

There is a very good engraving of him made for the Officers of the Royal Artillery from a painting by F. Coles, R.A., in possession of R.A. Institution.

GENERAL SIR A. FARRINGTON, BART., was the son of Lieut.-Colonel Charles Farrington, Royal Artillery, and served in America from 1764 to 1768, and again from 1773 to 1783, and was engaged in most of the actions with the Republicans from Bunker's Hill to the capture of Philadelphia.

He commanded the Royal Artillery at Plymouth in 1788-9, at Gibraltar 1790-1, at Woolwich 1794-7, and in Holland in 1799. He was D.C.L. of Oxford, and in consideration of his long and valued services he was created a baronet on the 3rd October, 1818. He served in three reigns, for the long period of sixty-eight years, being at the time of his death the oldest officer in the British service, retaining the use of his faculties and performing the functions of his office to the last.

LIEUT.-GENERAL THOMAS DAVIES saw much service in North America during the operations connected with the conquest of Canada. At one time (while a Lieutenant) he commanded a naval force on Lake Champlain, and took a French frigate of 18 guns after a close action of nearly three hours.

Lieut. Davies hoisted the first British flag in Montreal. He served as Captain of a Company in the most important actions of the American Revolutionary War. During his long service he had command of the Royal Artillery at Coxheath Camp, also at Gibraltar, in Canada, and at Plymouth. Was also two years Commandant of Quebec.

GENERAL VAUGHAN LLOYD was present at the battle of Minden (1759), the defence of Gibraltar (1779-1782), and commanded the Royal Artillery in the West Indies during part of the war against the French Republic (1793-95).

LIEUT.-GEN. SIR WILLIAM CONGREVE, BART., was selected when a Captain by Lord Townsend in 1778 to organise a school of instruction in Artillery exercises and machines, under the title of the Royal Military Repository, and was appointed Comptroller of the Royal Laboratory in 1783.

His energies in that department cannot be better exemplified than by the fact, that in consequence of the serious complaints of Admiral Barington, he was sent in 1779 to Plymouth, to examine the gunpowder of His Majesty's ships, and on inspection found only four serviceable barrels in the whole fleet. This led to the Government establishment at Waltham Abbey being founded

under his direction, and in a few years the quality of powder was so much improved as to lead to a large reduction of charges, many of which had continued down to that time to be one-half the shot's weight. It is probable to this that allusion is made in Congreve's epitaph: "He saved his country a million of money, but died unenriched himself." He served with distinction at the siege of Louisburg in 1758, at the capture of Havannah, and at Martinique. He commanded the Artillery in several of the earlier campaigns of the first American War. As Lieut.-Col. he commanded the Artillery under the Duke of York in Flanders, and at the siege of Valenciennes. The introduction of the block trail for Field Artillery is due to him. Less publicly known than his son the inventor of the Congreve Rocket, he nevertheless exercised an important influence on the instruction and science of the Royal Artillery.

The second Sir W. Congreve styles himself Colonel Congreve in his patents of 1812-13; but he was never in the regular army, although from his numerous artillery inventions, and from the circumstance of his having succeeded his father as Comptroller of the Royal Laboratories and superintendent of military machines at Woolwich, he is commonly supposed to have belonged to the Artillery. He first exhibited his rockets before Mr. Pitt and a number of cabinet ministers in 1805. Sir W. Congreve sat in Parliament for the borough of Galton in 1812, and for Plymouth in 1820-26. A very good portrait of Sir W. Congreve at the siege of Copenhagen (1807), is in the possession of the R.A. Institution.

L.T.-COLONEL FRANCIS DOWNMAN was, in 1758, with the army, at this time commanded by the Duke of Marlborough, at the destruction of the French shipping and stores at St. Malo; he was present at the demolition of the works and batteries at Cherbourg, and afterwards at the unlucky affair at St. Cas, commanding the only two 6-prs. that were on shore.

He sailed for the West Indies the same year with the army under the old General Hopson; was with the troops that made a landing in Martinique, and was very actively employed at the reduction of Guadaloupe, where he remained till the peace of 1763, except attending the troops that captured Dominica; he came to England at the end of the year 1763. In November, 1764, he was ordered with a small detachment of Artillery to Pensacola, in the Gulf of Mexico, to take possession of that miserable place, and had the misfortune to remain there till the year 1771, when he was ordered to St. Augustine, in the Gulf of Florida, where he remained till 1772.

He was with the army under General Howe; and was constantly employed from the time of landing at the head of Elk, till the entrance of the army into Philadelphia.

He was the only English officer with the troops under Count Donop, at the unfortunate attack on the works at Red Bank, on the Jersey shore. In November, 1778, he was ordered with the army under General Grant to the West Indies, and was much employed at the reduction of St. Lucia, where he remained till it was restored to France.

LIEUT. THOMAS DEANE PEARSE served in the Royal Artillery at St. Malo, Cherbourg, &c., in 1758, at Martinique and Guadaloupe in 1759, Belleisle in 1761, at Havannah in 1762, and in his own words, "though not at the head, he was in the heat of every attack." In 1768 his services were transferred to the Bengal Artillery, and in 1769 he succeeded to the command of that regiment as a Lieut.-Colonel, and "to him is mainly due the organization and efficiency of this honourable and distinguished Corps, of which he may be justly styled the father." He was the intimate friend of Warren Hastings, and his second in his famous duel with Francis.

In 1781 he marched by land in command of a detachment to Madras, and took part in the campaign of that year against Hyder Ali, and commanded the left wing of the army under Sir Eyre Coote at the battle of Cuppoor, where Hyder Ali was defeated. In 1783 he was wounded at the unsuccessful attack on Cuddalore, and returned to Bengal in 1784, the war having been brought to a close.

In April, 1783, Coote died, and the command of the army devolved on General Stuart, who in June proceeded, in a dilatory manner, to retake Cuddalore, where Bussy was commanding. On the 13th he made an assault, but was repulsed by a vigorous sortie from the garrison, and after a loss of 62 officers and 920 men killed and wounded, 500 of whom were Europeans, was driven back to the trenches.

The honor of the day was, in some measure, retrieved by the gallant conduct of the Bengal Sepoys, who had accompanied Col. Thomas Deane Pearse (by land) from Calcutta. They crossed bayonets with their European adversaries and with success. It had hitherto been supposed that native troops would not stand a bayonet charge of Europeans.

From Pharos & Co.'s "Gazetteer of Southern India," Published 1855, page 291.

He died at Calcutta, 15th June, 1789, and a handsome pillar of the Corinthian order was raised to his memory at Dum-Dum by his brother officers, in testimony of their respect.

MAJOR STEPHEN PAYNE ADYE when a subaltern, produced the well-known work on Courts-martial, which has, by the aid of successive editors, continued to be one of the highest authorities on that subject down to the present day. He served as Brigade-

Major to the Royal Artillery in the American war, but retired early. He is principally commemorated as the first of a name which has been distinguished in the Artillery for a century.

134 GENERAL SIR THOMAS BLOMEFIELD, BART., in 1759, commanded a bomb vessel at the bombardment of Havre, under Rodney. He subsequently joined the fleet in Quiberon Bay, selected perhaps for this amphibious duty on the grounds of having been a midshipman in H.M.S. "Cambridge" before he joined the Royal Military Academy. In 1762 Lieut. Blomefield was present at the capture of Martinique and the Havannah; subsequently of the Pensacola and Mobile. In 1776 Captain Blomefield proceeded to America as Brigade-Major to Brigadier Phillips.

Among his services at this period was the construction of floating batteries upon the Canadian Lakes, and he was actively engaged with the army under General Burgoyne until the action which preceded the unfortunate convention of Saratoga, when he was severely wounded by a musket shot in the head. In 1780 Captain Blomefield was appointed Inspector of Artillery and of the Brass Foundry.

Never was the need of military supervision over military manufactures more apparent than at this period. The guns supplied to the naval and military services had degenerated to the lowest point in quality.

Attacking these abuses vigorously, Captain Blomefield the very first year of his appointment condemned no less than 496 pieces in proof; and so fully were the advantages of the new rules appreciated that a royal warrant was issued in 1783 reorganizing the whole department, which was placed under his entire direction.

From this period dates the high character of British cast-iron and brass ordnance.

Major-General Blomefield was selected in 1807 to command the Artillery in the expedition to Copenhagen, and received for his services on this occasion the thanks of both Houses of Parliament, and a baronetcy.

69 LIEUT.-GEN. ROBERT LAWSON served at the attack and siege of Belleisle.

In January, 1793, the first troop of Royal Horse Artillery was organized, and he obtained the command of it, the formation of three others was also superintended by him, and he arranged the drill, so as to enable them to conform to the movements of calvary. In 1800 Colonel Lawson was appointed to the command of the Artillery ordered on the expedition to Egypt under Sir Ralph Abercrombie, upon which he was honoured with a commission (dated 6th June, 1800) as Brigadier-General in that army, and in this service he was wounded severely at the battle of Alexandria.

"Short Notes on Professional Subjects," p. 19, published with the "Proceedings" R.A. Institution, contains a paper extracted from a MS. of General Lawson's, describing his ingenious measures for overcoming some of the novel difficulties presented by a campaign in that country.

At the conclusion of this campaign, his and the chief engineer's service are thus mentioned in Sir John Hutchinson's dispatch:—

"Brigadier-General Lawson, who commanded the Artillery, and Captain Brice, the chief engineer, have both great merit in their different departments. The local situation of Egypt presents obstacles of a most serious kind to military operations on an extended scale. The skill and perseverance of these two officers, however, overcame difficulties which at first appeared almost insurmountable."

On the 5th December, 1801, he received his commission *en seconde*, and on the renewal of the war and alarm of intended invasion, it was thought proper to take some measures for the defence of London, and Col. Lawson was employed in respect to the batteries proposed for the occasion. After they were arranged and the alarm subsided, he was ordered to Chatham Lines (where some extensive new works were carrying on), with the appointment of Brigadier-General on the Staff of Great Britain, and remained there some years.

LIEUT. GEORGE HARRIS. Although it was not as an artilleryman that Lieut. Harris became famous, the Corps must ever feel proud that one who was a distinguished soldier and created a peer for his services, should have received his military education in the R.M. Academy, and have begun his career in the Regiment.

The company to which Lieut. Harris belonged was reduced in 1763, when he obtained a commission in the 5th Foot, in which regiment he became Captain in 1771, and in 1774 he went to America, and was dangerously wounded at the battle of Bunker's Hill, and was afterwards engaged in many actions with the republicans. In 1778, Major Harris was second in command of an expedition to St. Lucia. In 1788 he went to Bombay as secretary and aide-de-camp to the Governor, Sir William Medows, and in 1790 took the field against Tippoo Sultan and was engaged at Bangalore, Severndroog, Mundydroog, and the attack on the island of Seringapatam, on the 6th February, 1792.

In January, 1797, being then Lieut.-Gen., he was appointed to the command of the Madras army, and in February, 1798, succeeded to the charge of the civil government of Madras. In January, 1799, General Harris took command of the army destined to act against Tippoo Sultan, and was engaged at the battle of Malavelly, and the glorious siege of Seringapatam, which fell on the 4th May, 1799, the great Tippoo being killed in the gateway by the storming party.

In 1815, General Harris was raised to the peerage as Lord Harris of Belmont, in Kent,

376

and of Seringapatam and Mysore in the East Indies, received the G.C.B., and was appointed Governor of Dumbarton Castle.

424 MAJOR-GEN. ROBERT DOUGLAS served with distinction in America during the Revolutionary War. Was appointed Commandant of the Corps of Artillery drivers on their establishment in 1795, and retained the appointment until the breaking up of the Corps in 1817.

456 LIEUT.-GEN. SIR JOHN MACLEOD, G.C.H., on the breaking out of the American Revolutionary War was sent by his company to New York. He commanded the Artillery at the battle of Guildford, 15th March, 1781, when he won for himself not only the esteem, but the personal friendship of Lord Cornwallis. On his return from America, Lieut. Macleod was placed on the Staff of the Master-Gen.; and from this time till his death was employed in the important duties of the organization of the regiment, and of the arrangement and equipment of the Artillery for all the expeditions (of which there were no fewer than eleven) during this period. He held successively the appointments of chief of the Ordnance Staff, Deputy Adjutant-General, and Director-Gen. of Artillery. He commanded the Royal Artillery during the expedition to Walcheren in 1809; the Earl of Chatham, who commanded the army, being at the time Master-General.

In 1820, George IV., desirous of marking his sense of his long and important services, conferred upon him the honor of knighthood, and invested him with the Grand Cross of the Royal Guelphic Order.

458 GENERAL SIR JOHN SMITH, G.C.H., served in Canada in 1773, and was present at St. John's, where he was taken prisoner 5th Nov., 1775. In January, 1777, he was exchanged and joined the army at Rhode Island, under the command of the then Earl Percy, and shortly after that at New York, under Sir William Howe; he was in all the subsequent actions and sieges during the war, viz. :—

Brandywine Creek...Sept. 11, 1777.
German Town.....Oct. 4, 1777.
Charleston, Siege ...April 1 to May 11, 1780.
York TownOct. 19, 1781.

When Lord Cornwallis surrendered, Capt. Smith was allowed to return to England on parole, after a service of nine years in America. In October, 1795, he was ordered to the West Indies, under the command of Sir Ralph Abercrombie, and assumed command of the Artillery. Here he remained until 1797, when he was relieved consequent on ill health. In 1799, he was in Holland with the Duke of York, and he concluded his active service at Gibraltar, serving on that station from 1804 to 1814, first as commanding officer of the Artillery, and finally as Governor.

LIEUT.-GEN. SIR EDWARD HOWORTH, K.C.B., G.O.H., served in America, and was taken prisoner at Saratoga, 7th Oct., 1777. As Brigadier-General he commanded the Royal Artillery at the battles of Talavera, Busaco, and Fuentes d'Onoro.

COLONEL JOHN HARDING commanded Royal Artillery at the battle of Corunna.

LIEUT.-GEN. GEORGE COOKSON served in the Royal Navy during the American War, at the alternate captures and defences of the West India Islands, 1773-7. He received a commission in the Royal Artillery in 1778, and in 1785 commanded a detachment of the corps on the unhealthy shores of the Black River in South America for nine months.

Served in 1793, in the campaign in Flanders, under the Duke of York, and opened the first British battery against the besieged city of Valenciennes, and commanded the Royal Artillery in the trenches, at the successful storming of the covered way and horn-work, under Sir Ralph Abercrombie, on the 25th July.

In 1801, the successful landing in the Bay of Aboukir took place, when all the field guns were landed, according to a plan of Major Cookson's (never before adopted), and brought into action, as soon as, if not before, the infantry. He was upwards of two years in Egypt, and commanded the Artillery at the sieges of Aboukir and Marabout, and in the advanced lines before Alexandria, from April 7th to August 16th, when he embarked in command of the Artillery, and landed with the army to the westward of Alexandria, under General Sir Eyre Coote, whose thanks he received in public orders, and was particularly mentioned in the despatches, as having, with the Artillery under his command, borne the brunt of the action of the 22nd August. On the 29th October, 1801, he was appointed by Major-General Hutchinson, commandant of the ancient Pharos Castle, and of all the Artillery in Egypt, and was presented with a gold medal by the Grand Seignior, which he was permitted to wear by His Majesty, as shewn in General Orders, 6th October, 1803. At this time he was only a Major in the army.

In 1805, Lieut.-Col. Cookson was called upon by desire of Lord Cathcart, to take command of the Artillery (102 pieces and 2000 artillerymen and drivers) in Hanover, with the army under the command of his lordship, but the battle of Austerlitz terminated the campaign, and he returned to regimental duty.

In 1807, he accompanied Lord Cathcart in the expedition to Copenhagen, and commanded the whole of the Artillery in advance till within nine days of its surrender, when he commanded all the batteries on the right of the British lines.

In October, 1808, he embarked in command of the Artillery, consisting of 48 guns (Field), and 1200 men, to be landed at Corunna with the army under Sir David Baird, and on the 29th December following, supported with the Horse Artillery, the cavalry on the plains of Benevente when the French General Lefebre and several of the Imperial Guards were made prisoners.

Commanded a division of Artillery in the expedition to Walcheren in 1809.

MAJOR-GEN. WILLIAM MUDGE, F.R.S., was the member of a family of somewhat remarkable talents, and was the nephew of that Thomas Mudge to whom the second parliamentary prize of £3000 for chronometers, under the Act of 1774, was awarded in 1793; he very early displayed those tastes and abilities which warranted his selection to carry out the Trigonometrical Survey of Great Britain which had been arrested by the death of Major-General Roy, in 1790. To this great work his life was devoted. The Philosophical Transactions and the recent re-publications of the earlier proceedings of the Ordnance Survey are the best monument to his memory.

Captain Mudge was elected Fellow of the Royal Society in 1798, and subsequently received numerous literary and scientific distinctions, including that of being elected corresponding member of the French Institute

588

LIEUT.-GENERAL HENRY SHRAPNEL served with the Duke of York's army in Flanders, in 1793, and was wounded in the action near Dunkirk, in September of that year. He was appointed first Assistant Inspector of Artillery in 1804, and was chiefly engaged for many years in bringing to maturity the destructive missile, which in nearly every army in Europe is known by his name.* The shrapnel shell was first proposed in 1799, and was recommended for adoption into the service in 1803. We find the new projectiles favourably reported on in the attack on Surinam the following year. Their after progress, although frequently retarded by defects of manufacture, the imperfection of the fuze, and the difficulties incidental to all considerable novelties in Artillery, was nevertheless steady and triumphant.

Colonel Shrapnel's services to the country were rewarded in 1814, with a pension of £1,200 a year.†

596

LIEUT.-GEN. SIR WILTSHIRE WILSON, K.C.H., joined the army on the Continent, under the Duke of York, at the commencement of 1793, and was continually employed during that and the succeeding year, and was wounded at the attack of Dunkirk, August 24th, 1793.

* An interesting account of "Shrapnel of the Past" by Major-General W. B. Gardner, R.A., will be found in the "Proceedings," R.A. Institution, Vol. V. p. 385.

† Excellent portrait in oils, by Arrowsmith, R.A., is in R.A. Institution.

As Captain Wilson he commanded the Artillery at Nieuport (1793) at the time that place was successfully defended against a French army, commanded by Van Damme, who was obliged to retire with very considerable loss on the sluices being opened. In consequence of the gallantry of the fishermen of this town, H.R.H. the Duke of York incorporated them into a company of Artillery, and was pleased to give the command of it to Captain Wilson in July, 1794.

Again commanded the allied Artillery at the defence of Nieuport, when that fortress was defended by General Diepenbrook with 1500 men (including 500 emigrants and the company of Artillery above alluded to), for the space of 19 days against General Moreau; Moreau's army consisting of 40,000. On a capitulation being entered into, the garrison marched out with all the honors of war, and Captain Wilson remained a prisoner nine months, when on being exchanged he was sent to England.

In 1795 proceeded in command of the Artillery with the expedition under Major-General Doyle to Quiberon Bay to aid the Loyalists in that quarter, and shortly after the capture of Isle Dieu returned to England.

In 1798 was in the expedition which proceeded to Ostend under Major-General Sir Eyre Coote, and was again taken prisoner and sent to Lisle.

In 1800 he was sent to the West Indies, and commanded the Royal Artillery at the taking of St. Lucia, 22nd June, 1803; Tobago, 30th June, 1803; and Surinam, 5th May, 1804.

COLONEL GEORGE F. KOEHLER first attracted attention during the defence of Gibraltar in 1782, by the invention of a depressing carriage. Drinkwater, in his history of the siege of Gibraltar, says, "As to the accuracy of the depressing shot, no further proof need be adduced, than that out of thirty rounds, twenty-eight shot took place in one traverse in the St. Carlos Battery, at the distance of 1400 yards." General Elliott at once placed Lieut. Koehler on his staff, and in 1786 took him with him to the Continent. An interesting collection of coloured plates made from drawings by this officer during the siege of Gibraltar, is in the possession of the R.A. Institution.

At this time the Flemings at Ghent were engaged in an attempt to shake off the Austrian yoke. Being greatly in need of a skilful Artillery officer, they solicited Elliott (now Lord Heathfield), through Count Dillon, to grant leave of absence to Lieut. Koehler, to whom they offered the rank of Major-General in their service. The leave was granted, and the position accepted; but in a short time the Flemings had to give up their cause as hopeless, and Koehler returned to England.

605

Commanded Royal Artillery at the defence of Toulon (1793), and in Corsica (1794).

Towards the end of the year 1798 a military mission was sent from England to co-operate with the Turks against the French, who had by that time gained a strong footing in Egypt. The command was entrusted to Lieut.-Colonel Koehler, (with the local rank of Brigadier-General), he having been at Constantinople on a former occasion, and made himself acquainted with the language and customs of the Turks. After spending some time in Constantinople, Koehler and others of his mission embarked in January, 1800, for Syria, and on his way to that country he surveyed the islands of Patmos and Cyprus. The Grand Vizier being desirous of strengthening the port of Jaffa, General Koehler delivered plans for this purpose, and Colonel Holloway and the Engineers at once proceeded to carry them into execution.

A few months afterwards the General was one of the first victims to a malignant fever which broke out in the camp at Jaffa.

624 MAJOR-GENERAL SIR H. FRAMINGHAM, K.C.B., served in the Peninsula at the battles of Talavera, Busaco, Fuentes d'Onoro, the sieges of Badajoz, and the battle of Salamanca: at the two latter places he commanded the Royal Artillery.

635 MAJOR-GENERAL JOHN LEMOINE, C.B., served at Toulon and Corsica 1793-4. Commanded the Royal Artillery in Italy from 1806 to 1814, including the battle of Maida, and the captures of Savona, Spezia, and Genoa.

645 CAPTAIN RALPH WILLET ADYE was the eldest son of Major S. P. Adye, and was the author of the "Pocket Gunner," a work first published in 1798, and which maintained its character as the best book of reference for thirty years.

651 LIEUT.-GENERAL WILLIAM MILLAR, in 1804, on the rebuilding of the Royal Arsenal after the great fire, was appointed assistant to Colonel Fage, in the Royal Carriage Department, and was one of those officers to whose skill and indefatigable exertions during the Peninsular War the services were indebted for their *matériel*. With mechanical resources which, judged by the standard of the present day, were of the most imperfect description, they produced a never failing supply of war stores, of a quality and excellence which drew forth the admiration of other armies, and at the close of the war led to the commission of Baron Dupin to inquire into the systems which could produce such results.

Colonel Millar was the originator of the 10-inch and 8-inch shell guns which, from 1832 to 1859, formed so large a part of our armaments. He was among the first to

perceive the advantages of shell guns of large calibre, and as early as 1820, he brought forward his first 8-inch shell gun.

LIEUTENANT-GENERAL BENJAMIN LORD BLOMFIELD, G.C.B., G.C.H., when Captain-Lieutenant of Horse Artillery served during the rebellion in Ireland, and was present at the battles of Ross and Vinegar Hill. In 1806 he was appointed gentleman attendant upon the Prince of Wales; and in February, 1812 became 1st Equerry and aide-de-camp to the Prince Regent, and being a great favourite with His Royal Highness, he was soon advanced to the rank of Chief Equerry and Clerk Marshall. In 1815 he received the honour of knighthood. In 1817 was appointed Receiver-General of the Duchy of Cornwall, Keeper of the Privy Purse and Private Secretary to his patron, the Prince Regent, and at the same time was sworn a member of the Privy Council. For a period of five years from that date he was the confidential adviser of the Prince (who during this time became George IV.), and was, so to speak, the chief executive officer of his administration. In 1822 he was sent as minister plenipotentiary and envoy extraordinary to the King of Sweden, upon which occasion he received the distinction of a civil Grand Cross of the Bath. On his return in 1825 he was raised to the rank of a Baron in the peerage of Ireland by the title of Lord Bloomfield.

In 1838 he was appointed Commandant of Woolwich Garrison, and resigned that appointment a few months before his death, in 1846.

COLONEL SIR W. ROBE, K.C.B., K.C.H., K.T.S., went to Holland with the 2nd Division of the Duke of York's army in April, 1793, and remained with it till January, 1795. Between these periods, besides the duties of a subaltern of Artillery, he acted at the instance of General Sir W. Congreve, as Inspector of Ammunition, having charge of all that belonged to the army, and further during the winter of 1794-5 was on the general staff of the army, and present at the battle of Famars and subsequent siege of Valenciennes (1793), the operations round Cambray to Landrecies, 9th August, 1793, siege of Dunkirk, 7th September of the same year, also the attacks by, and operations against the enemy near Tournay, 10th, 17th, 18th, and 22nd May, 1794, and during the retreat into Holland, particularly at the Bridge of Waerleu and at Nimeguen.

Was present at the battle of Bergen, 2nd October, 1799, and the advance to and possession of Alkmaer, 6th October, 1799.

From 1800 to 1806 he served in Canada, and was employed to plan and build the Protestant Cathedral of Quebec, which remains a lasting record of his talent and abilities.

In 1807 Lieut.-Colonel Robe went to Copenhagen under the orders of Sir T. Blomefield with the forces of the British army under Lord Cathcart, and was in command of all the batteries on the left of the lines of attack.

In 1808 went to Portugal in command of the Artillery under the orders of Sir Arthur Wellesley, and was at the battles of Rolica and Vimiera, and remained with Sir Arthur till the evacuation of Lisbon, when he was ordered to take possession of the Artillery in the Citadel.

Was at the capture of Oporto, 11th May, 1809, battle of Talavera de la Reyna, 27th July, and battle of Busaco, 1810, but being detained by illness at Coimbra, did not arrive at Fuentes d'Onor till the evening after the battle. On the morning after the capture of the Picurina Fort (Badajoz) opened the principal breaching battery, and was noticed on that occasion in despatches.

Present at the battle of Salamanca and the several attacks and siege of its forts. Commanded the Royal Artillery on the entrance of the army into Madrid, and at the unsuccessful siege of the Castle of Burgos; was severely wounded on the retreat from that place, and obliged to return to England.

64 MAJOR-GENERAL SIR G. ADAM WOOD, C.B., K.C.H., commanded the Royal Artillery in Holland, including the unsuccessful assault on Bergen-op-Zoom, 8th March, 1814. Also commanded the Royal Artillery at Waterloo. A.D.C. to K. Geo. III. Govr. of Carlisle.

27 SIR JOSEPH CARNCROSS, K.C.B., served in the West Indies from 1797 to 1801; at Walcheren, 1809; and in the Peninsula from 1811 to the end of the War, including the battles of Salamanca (siege of Burgos), Vittoria, Pyrenees, Nivelle, Nive, Orthes, and Toulouse.

40 LIEUT.-COLONEL ALEXANDER DUNCAN served as a subaltern at the defence of Toulon in 1793, and in Nelson's famous brigade at the capture of Bastia and Calvi, in Corsica, in 1794. As Captain he served in Egypt in 1801, and the retreat of the French at Alexandria was hastened by the fire from a 24-pr. in the redoubt, which he levelled with such admirable precision that the first three shots struck down the enemy in ranks, and by the time the fourth was fired they were beyond range. As Major and Lieut.-Colonel he commanded the Royal Artillery during the defence of Cadiz in 1810-11-12, at the battle of Barrosa (where the British Artillery covered themselves with glory), and at Seville, where this gallant officer was killed by the explosion of a powder mill which had been taken from the French.

742 LIEUT.-GENERAL SIRT. DOWNMAN, K.C.B., K.C.H., served with the army under the Duke of York in 1793-4 on the Continent, and was

at the attack of Lannoy, Rauxhain, and Mourveaux, and was taken prisoner in the action near Tournay, 18th May, 1794.

In May, 1798, embarked for St. Domingo, and was present at the surrender of that island by Major-Gen. Maitland to Toussaint l'Ouverture. In 1808 he went to Corunna with his troop, and was attached to the cavalry under Lord Paget, afterwards the famous Marquis of Anglesey, and marched with that corps in its forced march to Zamoza, and was present at the affairs of Sahagun and Benevente. In May, 1811 was with the army at Fuentes d'Onor in command of the Horse Artillery, and was engaged in the affairs of Aldea de Puente, and during the retreat of the army from its position in front of Gumeldo.

Was present, though not engaged, at the siege of Ciudad Rodrigo. In 1812 he was attached to the head quarters of the cavalry, being in command of the Horse Artillery, and was present at most of the cavalry affairs which took place in the movements of the army during the whole of this campaign. Was at the capture of the forts of Salamanca, the advance to Madrid, and taking of the Retiro.

Was also engaged in the several affairs in the advance of the army to Burgos, particularly on the day previous to the investment of the Castle, and commanded the Artillery with the rear guard of the army during the whole of its retreat from Burgos into Portugal, and was very often engaged with the enemy, particularly in front of Aledo. He had the honour of being mentioned in the Duke of Wellington's despatch as having distinguished himself, in consideration of which he received the brevet of Lieut.-Colonel.

Sir Thomas Downman was Director-General of Artillery in 1843-4, and Commandant at Woolwich, from April, 1846 till his death in 1852.

752 MAJOR-GENERAL STEPHEN GALWAY ADYE, C.B., was the second son of Major S. P. Adye, and saw much service. He was with Abercrombie in Egypt in 1801, and was at the battles of Alexandria and Ramanieh, he also took part in the Walcheren expedition in 1809; served also during the Peninsular War, and commanded the Artillery of the 1st Division at the battle of Waterloo. He died in 1838, when Superintendent of the Royal Laboratory.

756 MAJOR-GENERAL PETER FYERS, C.B., served as a Lieutenant in Holland, during the campaigns of 1794-5. As Captain he went with a detachment of the Royal Artillery, which, in 1801 accompanied the fleet under Lord Nelson to the Baltic, and at Copenhagen he was appointed by Sir Hyde Parker, Acting Engineer to the force. He was wounded during the attack on the French flotilla at

Boulogne, on which occasion he was highly spoken of in Nelson's despatch. He was at Copenhagen in 1807, and at the siege of Flushing in 1809, and served again in Holland during the campaign of 1814, where he greatly distinguished himself. In the action at Merxem a gun laid by him silenced a battery of several guns of the enemy, which threatened the flank of the 78th, then advancing to drive the French out of the village. For this service he was thanked in General Orders and decorated with the C.B. He was also present at the attack on Bergen-op-Zoom.

765

COL. SIR AUGUSTUS SIMON FRAZER, K.C.B., joined the army of the Duke of York in Flanders towards the close of the year 1793; and served in all the campaigns in that country, and in Holland down to the end of 1799. In 1803 was appointed to "G" Troop, Royal Horse Artillery, with which he embarked for South America in 1807, and commanded the Artillery in the disastrous expedition against Buenos Ayres, distinguished then, as afterwards in more glorious scenes, for the professional knowledge, the personal activity, the zeal and gallantry with which he played his part in the campaign. It was not until November, 1812, that Major Frazer was afforded the opportunity of showing, under a worthy commander, those high qualities of soldiership which marked him as one of the most brilliant and accomplished officers of an age fruitful in soldierly character. He commanded the Royal Horse Artillery in the campaign of 1813, and was at the battle of Vittoria, both attacks on St. Sebastian (of which he has left a graphic account), the passage of the Bidassoa, Nivelle, the affairs on the Nive, the crossing of the Adour in February, 1814, and the investment of Bayonne, where he received a musket ball through the shoulder; this, however, did not prevent his presence six weeks later at the battle of Toulouse. For these services he was created a K.C.B. in 1815.

In 1815 Lieut.-Colonel Sir Augustus Frazer again took the field with the Horse Artillery, which he commanded at the Battle of Waterloo. To his firm self-reliance and decision was due the fortunate circumstance that our Horse Artillery was not overpowered by weight of metal as it was outnumbered on that occasion. He prevailed on the Duke of Wellington, somewhat against his own predilections, to permit him, almost on the eve of the battle, to substitute 9-prs. for 6-prs. with many of the troops, and to arm one troop wholly with howitzers. "Had the troops continued with light guns," he writes, "I do not hesitate to say the day had been lost."

The Duke of Wellington selected Lt.-Col. Sir Augustus Frazer, in company with Major Sir George Hoste, R.E., in 1815, for the

delicate duty of arranging with French Commissioners and to examine and report "in the most exact and most expeditious manner the actual condition of the various fortresses of France, and to settle when they should be formally given over to the Allies." Their instructions were very precise, and reports of much interest were rendered to his Grace in the course of the following year.

COLONEL JOHN S. WILLIAMSON, C.B., was present at the attack on Ischia in 1809, and capture of Santa Maura, 1810.

780

He subsequently joined the army in Spain, and as Major was present at the battle of Castalla, under Sir J. Murray, in 1813; later in the year at the siege of Saragossa and the combat of Ordal, and in 1815 commanded the Artillery of the 3rd Division at the battle of Waterloo.

Whilst Superintendent of the Royal Military Repository his time was devoted to the preparation of a new and extensive course of instruction for the Artillery, which forms the basis of the exercise of heavy ordnance, and of all the miscellaneous instruction of the Artilleryman at the present day. The large experience, the sound judgment and eminently practical spirit in which this course is drawn up, give it a value which no mere change of *matériel* can affect. It will always remain a model for professional works of the kind.

GENERAL SIR HOWARD DOUGLAS, Bt., G.C.B., F.R.S., served as a subaltern of the Royal Artillery with the Duke of York's army in Flanders, 1794-5. He was afterwards employed under Col. Congreve in connexion with the field equipments prepared to resist the then threatened invasion, particularly in the organization and command of a field battery of 8-inch mortars mounted on travelling carriages, somewhat of the character of those re-introduced into the service in 1860.

783

Captain Douglas served in the Royal Artillery until 1804, when he was transferred to the Royal Military College, to organize a department for the education of Staff Officers, and he subsequently saw much active service on the general staff of the army, returning however, to the Staff Corps at the end of the war. Many allusions to this important period of his career, more particularly his observations on the guerrilla defence of Spain, will be found in his last work on "Modern Systems of Fortification." Sir Howard Douglas's active military life was chiefly on the Staff of the Army, and under his commission in the York Rangers; but to his old regiment—the Royal Artillery—belongs that early scientific training and intimate knowledge of the science and practice of gunnery which made him in later years the foremost authority on the subject of Naval Gunnery, nor did he ever cease to

consider himself an artilleryman, and therefore his name is honourably placed on the roll.

85 MAJOR-GEN. ALEXANDER MACDONALD C.B., commanded a troop of Horse Artillery in the Peninsula, and was engaged at Ciudad Rodrigo, Salamanca, Majalahonda, &c. Commanded the Horse Artillery of the cavalry division at the battle of Waterloo.

87 LIEUT.-COL. WILLIAM MARTIN LEAKE, F.R.S., was selected in 1799 for the then novel duty of instructing the Turks in the use and practice of artillery.

Leaving Constantinople the following year, he was ordered to proceed with Brigadier-General Koehler, R.A., through Asia Minor, to join the army of the Grand Vizier at Jaffa. Military events frustrated the mission at the time, but he joined the Turkish army towards the end of the year, and entered Egypt with it in 1801. After the surrender of Alexandria he was directed by Lord Hutchinson to accompany Mr. Hamilton to Upper Egypt, for the purpose of making a general survey of that country in a political and commercial as well as in a military and geographical sense. This was done, and the results published in 1809. Captain Leake was again sent to Turkey in 1804, to examine its fortresses and means of defence, and to advise with the pachas and chiefs. His labours were interrupted by hostilities in the course of which he was himself detained as a prisoner at Salonica, but they continued with intermission until 1809. From the information thus obtained, extended by subsequent reflection and study, those valuable and standard topographical works were produced which have placed their author in the foremost rank among classical authorities for learning, research, and accuracy.

01 LIEUT.-COLONEL ALEXANDER TULLOH, C.B., was in France when the war broke out in 1803, and with many other British Officers was detained as a hostage, and afterwards made a prisoner, suffering great indignities and privations for upwards of eight years. On the night of the 23rd December, 1810, he escaped from the fortress of Verdun, and after several narrow escapes of being re-taken, succeeded in reaching Harwich in safety on the 11th March, 1811. He at once applied to be sent on active service, and on the 19th August joined the army in the Peninsula as Captain of a Portuguese battery. Commanded the Portuguese Artillery at the siege and capture of Badajoz (where he was wounded), and held command of the Allied Artillery of Lord Hill's corps during the campaign of 1812. He commanded the Portuguese Artillery at Vittoria, the Nivelle, and the Nive, rendering most important service in the last-named action, where he also received

a dangerous wound which compelled him to leave the army, and for which he subsequently received a pension of £300 per annum.

MAJOR-GENERAL SIR A. DICKSON, G.C.B., K.C.H., entered the Royal Artillery on the 6th November, 1794.

844

It is not possible within the brief limits of this memoir, to do justice to the services of an Officer who was pre-eminently the first artilleryman of his day, and one of the most distinguished of the many celebrated Officers who served under the great Duke of Wellington.

As a Lieutenant, he was present at the capture of Minorca, in 1798, and at the blockade of Malta, and surrender of La Valetta, in 1800. Here, as subsequently at Monte Video, he served as acting engineer.

As a Captain, he commanded his company at the siege and capture of Monte Video, and the attack upon Buenos Ayres in 1807. He proceeded to Portugal in April, 1809, and served as Brigade-Major to the Royal Artillery under Colonel Howorth at the affair at Grigo, the capture of Oporto, and subsequent expulsion of Soult from Portugal in 1809. Shortly after this time he was given the command of the Portuguese Artillery, with the local rank of Lieut.-Colonel, and, by this arrangement, Lord Wellington was enabled to overcome the technical difficulty arising from the regimental seniority of other officers, and to treat Dickson as virtual chief of his artillery.

He commanded the Portuguese Artillery in the battle of Busaco, and at the Lines of Lisbon (Torres Vedras) in 1810, at the affair of Campo Mayor, the siege and capture of Olivença, and the battle of Albuera in 1811.

He commanded the artillery operations in 1811, at the first and second sieges of Badajoz, under Lord Wellington's immediate orders; also at the siege and capture of Ciudad Rodrigo, the siege and capture of Badajoz, the attack and capture of the forts of Almaraz, the siege and capture of the forts of Salamanca, and the siege of Burgos in 1812; and he commanded the reserve artillery of the army at the battle of Salamanca, and at the capture of the Retiro, Madrid, in the same year.

Colonel Sir W. Robe, who commanded the artillery of Lord Wellington's army, having been severely wounded at Burgos, was obliged to return home, and the chief command of the artillery was then conferred by Lord Wellington upon Dickson, who, by virtue of his rank in the Portuguese Artillery, was the senior officer of that arm in the Allied Army.

He commanded the Allied Artillery at the battle of Vittoria, 1813; the siege and capture of St. Sebastian, the passage of the Bidassoa, battle of Nivelle, and battle of Nive in 1813; and at the passage of the Adour, and battle of Toulouse in 1814.

The next campaign of Lieut.-Col. Dickson, was the inglorious one of New Orleans in 1814-15. He commanded the artillery of the expeditionary force, and was present in the attack on that place, and at the capture of Fort Bowyer, Mobile.

Returning from America early in the year, he was present and engaged in the battles of Quatre Bras and Waterloo, and subsequently commanded the battering train with the Prussian army at the sieges of Maubenge, Landrecies, Philippeville, Marienbourg, and Rocroy, in July and August, 1815.

To record the occasions on which this distinguished officer was honourably mentioned in public despatches would be to recapitulate nearly the whole of the foregoing actions.

Captain Dickson was promoted to Brevet-Major and Brevet-Lieut.-Colonel in 1812, but almost incredible to relate, he received no further promotion until 1825, when he attained the same rank regimentally, and was also appointed aide-de-camp to the king, with rank of Colonel in the army, on 27th May, in the same year.

In September, 1822, he was appointed Inspector of Artillery, and Deputy Adjutant-General, Royal Artillery, on 10th April, 1827, in succession to Lieut-General Sir J. Macleod, upon whose decease in January, 1833, he was appointed Master-Gunner, St. James' Park.

In 1838 upon the death of Lieut-General Millar, he succeeded that officer as Director-General of Artillery (Field Train Department), which appointment was combined with that of Deputy-Adjutant-General during his life. Sir A. Dickson was also a Commissioner of the Royal Military College, Sandhurst, and Public Examiner at Addiscombe. He was created a Knight Commander of the Bath in January, 1815, and on the 26th June, 1838, was made a Grand Cross of the same Order.

He was also a Knight Commander of the Guelphic Order (K.C.H.), and was in receipt of a good service pension of £365 per annum.

The following medals and Foreign Orders were conferred upon Sir A. Dickson, viz:—

(1) The gold Cross and six Clasps for the following battles and sieges in which he held a command of artillery:—Albuera, Busaco, Ciudad Rodrigo, Badajoz, Salamanca, Vittoria,* St. Sebastian,* Nivelle,* Nive,* Toulouse.*

(2) Medal for Waterloo.

(3) The Prussian Order of Merit.

(4) Knight of the Tower and Sword of Portugal.

(5) Portuguese medal for Peninsular War.

(6) Spanish gold and enamel Cross for Albuera.

At the conclusion of the Peninsular War a most gratifying testimonial to his great merits was presented to him by his brother officers of the Royal Artillery (many of whom

* Those marked * as commanding the artillery of the Allied army, the others as commanding the Portuguese artillery.

were his seniors in the Regiment) in the shape of a handsome sabre, on the blade of which is the following inscription:—"This sword is presented to Sir Alexander Dickson, K.C.B. and K.T.S. by the Officers of the Royal Artillery, who had the honor to serve under his command in the memorable campaigns of 1813-14, as a lasting mark of their gratitude to him for that zeal which added so much to the reputation of his Corps, at the sieges of St. Sebastian, and in the battles of Vittoria, Nive, Nivelle, Orthes, and Toulouse, the latter of which so successfully terminated their long and arduous services in Spain and France, under the Duke of Wellington."

Major-General Sir Alexander Dickson died in London the 22nd April, 1840, aged 63, and was buried at Plumstead Churchyard, with military honors.

The following General Order was issued by order of Lord Vivian, Master-General of the Ordnance:—

General Order.

33rd April, 1840.
1. It is with the most sincere and heartfelt grief that the Master-General has to announce to the Ordnance Corps and the Department generally the death of Major-General Sir A. Dickson, G.C.B., Deputy Adjutant-General, and Director-General of Artillery.

2. Indefatigable in the discharge of his duties, able as he was zealous, anxious to reward merit in others, and kind and considerate towards all, this distinguished officer has closed a career of uninterrupted service during 46 years, the earlier part of which was passed in combating the enemies of his country wherever its armies were most actively engaged, and the latter in the cultivation of the professional science, and promoting the interest of his corps and of the service.

3. In Sir A. Dickson the Officers of the Royal Artillery have lost a brother, the men a father and a friend, the Regiment one of its brightest ornaments, and Her Majesty one of her best and bravest soldiers.

4. The Master-General feels confident that every individual belonging to the Ordnance Corps and to the Department generally at Woolwich, will join with him in paying a last mark of respect by accompanying to the grave the remains of this most excellent and admirable man.

5. The funeral will take place at Plumstead on Tuesday, the 28th inst., at 12 o'clock.

The Commandant at Woolwich will give the necessary orders for the assembly of the Troops on the Parade in front of the Barracks, at 11 o'clock, and for the order of the Procession, &c.

6. The Officers of the Royal Artillery will continue to wear crape round their arms and swords for one month after the funeral.

(Signed)

J. E. JONES, Lt.-Col.,
A.-A.-General.

In 1817 a monument was erected to his memory by the officers of the Corps in the grounds of the Royal Military Repository at Woolwich, upon which is given the names of all the battles and sieges in which he took part.

Among the celebrated artillerymen whose names and deeds add lustre to the annals of the Corps, there is no name greater or more deserving of remembrance than that of Sir Alexander Dickson.

LIEUT.-COLONEL ROBERT BULL, C.B., KH., served as Lieutenant in the West Indies in the campaigns of 1796-98, during which he was nine times engaged in the island of St. Domingo.

Was in command of "I" Troop, Royal Horse Artillery (which was originally formed under his supervision) at the battle of Busaco, 1810: action of Sabugal, battle of Fuentes d'Onor, siege of Badajoz, 1811. At the battle of Waterloo he commanded the 5½-inch Howitzer Troop and was posted in rear of

the great orchard of Hougoumont, and by the personal directions of the Duke of Wellington he dislodged the French infantry from the neighbouring enclosures, a very delicate operation, considering the proximity of the Allied troops in the wood.

Was in command of the artillery of the second division of the Army of Occupation in France from the 13th July, 1816, to 30th December, 1818.

Lieut.-Colonel Bull was permitted to retire on full pay in 1834, consequent on being permanently injured by the wounds sustained during his long and distinguished services, and which rendered him incapable of exertion, or even walking without assistance.

On this Officer's retiring from the command of the Royal Horse Artillery he was presented with a handsome piece of plate by the Officers who were serving, and had served, in the Royal Horse Artillery with him, as a substantial proof of their esteem for his character as a soldier, and their regard for him as a friend.

177 **LIEUT.-GENERAL JAMES WEBBERSMITH, C.B.**, was at the attack of Minorca in 1798; siege of Malta, 1800; defence of Porto Ferrajo, 1802; expedition to Walcheren, and siege of Flushing, 1809; commanded a troop of Horse Artillery during the Peninsula campaigns of 1813-14, including the battle of Vittoria, passage of Bidassoa, Nive, and siege of St. Sebastian; also at the battle of Waterloo.

83 **MAJOR-GENERAL SIR JOHN MAY, K.C.B., K.C.H.**, was employed afloat in bomb service from December, 1797, to April, 1801, and was present at Copenhagen in 1807. Served in the Peninsula and France, first as Brigade-Major and afterwards as Assistant Adjutant-General of the Artillery, from January, 1809, to June, 1814, and took part in the battles of Talavera, Busaco, Fuentes d'Onor, sieges of Ciudad Rodrigo and Badajoz; siege of forts at the battle of Salamanca, battle of Vittoria; siege of St. Sebastian, passage of Bidassoa, Nivelle, and Nive; battle of Toulouse, and various other skirmishes; present at Quatre Bras and Waterloo, and capture of Paris.

90 **FIELD-MARSHAL SIR HEW DALRYMPLE ROSS, G.C.B.**, commanded "A" Troop, Royal Horse Artillery, then known as the "Chesnut Troop," during the Peninsula War and the Waterloo campaign, and with it took part in the action of the Coa, battle of Busaco, actions of Pombal, Redinha (wounded) Casal Nova, Foz d'Oronces (wounded), and Sabugal; battle of Fuentes d'Onor, action of Aldea Ponte, sieges of Ciudad Rodrigo and Badajoz (dangerously wounded), capture of the forts at Salamanca, action of Castrajon, battle of Salamanca, capture of Madrid and Retiro, affairs of San Munos and San Milan, battle of Vittoria, battles of the Pyrenees from 26th to 30th July, 1813; passages of the Bidassoa,

the Nivelle, and the Nive; battle near Bayonne, battle of Waterloo. Was made Knight Commander of the Bath in 1815, and Knight of the Tower and Sword for the Peninsula, and the 2nd Class St. Anne of Russia for Waterloo. Received the Gold Cross and two Clasps for Busaco, Salamanca, Badajoz (where he was dangerously wounded in the head), Vittoria, Nivelle, Nive, and the Silver War Medal with three Clasps for Fuentes d'Onor, Ciudad Rodrigo, and Pyrenees.

Commanded the Royal Artillery in the northern district with a delegated command of the troops in its northern counties from 1825 to 1840. Was Deputy-Adjutant-General of the Royal Artillery from 1840 to the commencement of the Crimean War in 1854. Lieut.-General and Acting Master General of the Ordnance from that date to the amalgamation of the War and Ordnance Departments in 1856, and Adjutant-General of Artillery at the Horse Guards from that period to 1858. Sir Hew was made a Grand Cross of the Bath in 1855. Created a Field Marshal of the Army (the first from the Royal Artillery) in 1867, and appointed Lieut.-Governor of Chelsea Hospital in July, 1868.

He entered the Royal Artillery at the age of 15 years and 8 months, and died in December, 1868, in his 90th year.

LT.-COLONEL HARCOURT FORDE HOLCOMBE, C.B., served under H.R.H. the Duke of Kent, in America, in 1795. Embarked in 1808 with Sir David Baird's expedition to Corunna, and nearly fell a victim to the fever that caused such a mortality in Sir John Moore's army on its retreat for embarkation in 1809.

In 1811 again joined the army in the Peninsula, and served at the sieges of Ciudad Rodrigo and Badajoz; after the fall of the latter place, he embarked at Lisbon in command of several companies of British and Portuguese Artillery, and proceeded to the Mediterranean, where he joined the army from Sicily, destined to act on the east coast of Spain, and was present at the siege of Tarragona, battle of Castalla, &c.

Lieut.-Colonel Holcombe was appointed Commanding Officer of Artillery at Lisbon in 1813, and remained there till 1815, and superintended the embarkation of all the immense ordnance depots, which had been established during the war in Spain and Portugal.

LT.-COLONEL WILLIAM CLEEVE served as a lieutenant at the capture of several West India Islands in 1801.

In 1806 he was noticed in General Orders by Lieut.-Gen. Bowyer, "on beating off, by his spirited and well-directed fire, a squadron of considerable force of French line-of-battle ships which attempted to destroy the shipping in Guinea Bay in the island of St. Christopher."

895

935

In 1809, at the capture of Martinique, he was noticed in General Orders by Lt.-Gen. Sir George Beckwith, who expressed "his approbation and admiration of his conduct in command of the artillery at the siege operations of Fort Desaix, in having, during the bombardment, continued to use his mortars without their beds (the fire therefrom dismounting several pieces of the enemy's ordnance which had been most destructive to the men in the sailors' battery), marking a resource and intelligence highly honourable to himself and useful to the King's service."

Was at the capture of Guadaloupe and other smaller islands in 1810, and at the capture of Guadaloupe in 1815.

For his services as Commanding Officer of the Royal Artillery at the capture of Martinique and Guadaloupe, he received from the King of the French, at the restoration of those islands, the decoration of the *Fleur-de-Lys*, and the Brevet of Major.

979

GENERAL SIR R. W. GARDINER, G.C.B., K.C.H., was sent to Gibraltar, then partially blockaded by the French and Spanish fleets in 1797, and remained there till November, 1798, when he embarked with the expedition under Sir Charles Stuart, and was present at the capture of Minorca. In 1805 commanded 12 guns with the force under Lient-General Don, forming the advance corps of the army destined to serve under Lord Cathcart in the north of Germany, combined with the Russian army under Count Tolstoy. The battle of Austerlitz put an end to this campaign and the British troops returned home.

Captain Gardiner, however, having effected an exchange, joined the force employed against the French in Sicily.

Early in 1808, when Sir John Moore was named to the command of the expedition to Sweden, he applied to take Captain Gardiner on his staff; his application, on account of the regulations of the Corps at that time, did not meet with success. Captain Gardiner, therefore again exchanged for active service, and joined the army assembling at Cork under Sir Arthur Wellesley; landing with it at Mondego Bay, and advancing from Lavaos, was engaged at Roleia, Vimiera, and at the capture of Lisbon.

Served as Brigade-Major of Artillery in the Corunna retreat, and also with Lord Chatham's army in the expedition to Walcheren; and was present at the capture of Middleburg and Flushing. In 1810 he went to the Peninsula, and as Second Captain of a company was present at the defence of Cadiz and battle of Barrosa. In November, 1811, he was promoted to the command of a company with which he served at the siege of Badajoz, battle of Salamanca, capture of Madrid, and siege of Burgos. In the winter of 1812-13, he was appointed to the command of "E" Troop, Royal Horse Artillery, and was afterwards engaged at Morales, Vitoria,

Pyrenees, Orthes, Tarbes, and Toulouse. His troop also rendered important services at the battle of Waterloo.

Returning home in January, 1816, Sir Robert was selected for the post of principal equerry to Prince Leopold of Saxe-Coburg, on his marriage with the Princess Charlotte of Wales, and retained this appointment until His Royal Highness accepted the throne of Belgium in 1831, after which he continued to reside at Melbourne, on the Claremont estate. He was military Aide-de-Camp to George IV., William IV., and to Her Majesty until 1841.

In 1848 Sir Robert Gardiner was appointed Governor and Commander-in-Chief of Gibraltar, and his public service terminated with this appointment in 1855.

This distinguished officer was created a Knight Commander of the Bath in 1815, was advanced to the Grand Cross in 1855, and received the Order of the Guelph for his services in Hanover, the 2nd Class of the Russian Order of St. Anne, as well as the Gold Cross and two Clasps; the Silver War Medal and three Clasps, and the Waterloo Medal.

GENERAL SIR E. C. WHINYATES, K.C.B., K.H., served in the expedition to the Helder and campaign in North Holland in 1799, and was at the capture of the towns of Helder and Huysduinen, and the seizure of the Dutch fleet in the Texel. Was in the expedition to Madeira in 1801, and assisted at the capture of that island.

Commanded one of the principal siege batteries (the "Churchyard," consisting of eight 24-prs. and two howitzers) in the attack on Copenhagen in 1807, and the vigorous and well-directed fire therefrom, materially contributed to the success of that important operation, the capture of the Naval Arsenal and the Danish fleet.

Served in the Peninsula* from February, 1810, to July, 1813, including the battles of Busaco and Albuera; affairs at Usagre, Aldea de Ponte, San Munos, and the attack and defeat of General Lallemand's cavalry at Ribera; commanded the Rocket Troop, and was severely wounded in the left arm at the battle of Waterloo. Was Commandant of Woolwich Garrison, 1852-1856.

GENERAL SIR JOHN MICHELL, K.C.B., served in the campaign in Holland in 1799; in the Peninsula and South of France from August, 1813, to May, 1814, including siege of San Sebastian, passage of the Bidassoa, Nivelle, and Nive, battles of Orthes and Toulouse; in America from May, 1814, to May, 1815, including the attack on Washington, Baltimore, New Orleans, and other operations on the coast. Was attached to the Prussian army employed in reducing the fortresses in the Netherlands after the battle of Waterloo.

MAJOR WILLIAM NORMAN RAMSAY served with great credit in Major Bull's Troop of Royal Horse Artillery in the campaigns of 1811-12-13. It was in the first of these that he performed an action whose daring and brilliancy has ever given peculiar distinction to his name. On the 5th May, 1811, the British cavalry out-guards being far outnumbered near Fuentes d'Onor, were driven in upon their supports, and Captain Ramsay* found himself cut off.

Then commenced a scene which can be best described in the words of the historian of the Peninsula War:—

"Guns thus dealt with are almost always lost, and consequently the army ceased to think of Ramsay and his men, except as prisoners. Presently, however, a great commotion was observed among the French squadrons; men and officers closed in confusion towards one point, where a thick dust was rising, and where loud cries and the sparkling of blades and flashing of pistols indicated some extraordinary occurrence. The spectators gazed with intense interest.

"Suddenly the multitude was violently agitated, an English shout arose, the mass was rent asunder, and Norman Ramsay burst forth at the head of his battery, his horses breathing fire and stretching like greyhounds across the plain, his guns bounding like things of no weight, and the mounted gunners, in close and compact order, covering the rear."

This brilliant action did not avail Captain Ramsay when after the battle of Vittoria, where Bull's Troop under his orders had been of unusual service, he incurred the displeasure of Lord Wellington for an involuntary disobedience of his supreme orders in obeying an order of the Quarter-Master General of the Army, and he was pointedly omitted from notice on that occasion.

This incident did not prevent his receiving a brevet majority, after the battle of Bidassoa in the November following; but it left a wound which was never healed on that proud and gallant spirit.

Was engaged with his troop in the action at Pampeluna and passage of the Nive, and also hotly before St. Jean de Luz in December. Major Ramsay fell at Waterloo, killed by a shot at the close of the battle, when in command of "H" Troop, R.H.A.

074

GENERAL SIR W. G. POWER, K.C.B., K.H., served in Spain, Portugal, and France, from 14th October, 1808, to 4th June, 1814, including battle of Talavera, sieges of Ciudad Rodrigo (wounded), and Badajoz, capture of French works at Almaraz, reduction of forts at, and battle of Salamanca; siege of Burgos (wounded), siege of San Sebastian; passage of the Bidassoa, Nive, and Adour. Sir W. Power led the reserve to the assaulting party of Fort La Picurina during the last siege of Badajoz, and the Commandant surrendered to him personally.

114

LT.-GENERAL THOMAS DYNELEY, C.B., served in the campaign of 1805, in Italy; was present at the battle of Maida, and siege of Scylla, in 1806. Served in the Peninsula,† from July, 1811, to November, 1813, including the siege of Ciudad Rodrigo (wounded in the head); siege of forts at Salamanca; heights of St. Christovel, battles of Salamanca, Vittoria, and the Pyrenees, besides numerous

affairs of outposts; during one of the latter, at Majalahonda (11th August, 1812) he was taken prisoner, but escaped from the enemy, and rejoined the army the 23rd of the same month. Engaged at Waterloo.

1117

MAJOR-GEN. JOHN BOTELER PARKER, C.B., served at Walcheren, and was present at the siege of Flushing. Served in the Peninsula and South of France from February, 1812, to April, 1814, including the battle of Vittoria, both sieges of San Sebastian, battle of Orthes, affair at Tarbes, and battle of Toulouse. Lost left leg at Waterloo. Held the appointment of Second Captain to the Company of Gentlemen Cadets from 28th December, 1821, to 18th January, 1837, and Lieut.-Governor of the Royal Military Academy from 1st April, 1846, up to the time of his death, which took place on the 25th March, 1851.

1134

GENERAL SIR WILLIAM CATOR, K.C.B., served in the campaign of Walcheren, including the capture of Middleburg and siege of Flushing.

At the commencement of the Russian War in 1854, he was appointed to command the Royal Artillery, and the rank of Brigadier-General was conferred on him.

During the summer passed by the Allied armies at Varna, General Cator's experience proved of great service to Lord Raglan in organizing transport for the ammunition of the army, and also in arranging all the details connected with the artillery for the great siege of Sebastopol. His health, however, gave way, and to his great mortification he was obliged to relinquish the command of the artillery just as the expedition was starting for the Crimea. On returning home he resumed the duties of Director-General of Artillery, which appointment he held from August, 1852, till the office was abolished in 1859.

In 1812 he was present at the assault and capture of the Salamanca forts, also at the battle of Salamanca, and combat of Castrejon. Served in the Netherlands, from December, 1813, to May, 1814, at the capture of Merxem, bombardment of Antwerp, and in the night attack on Bergen-op-Zoom. He afterwards served in Spain as British Commissioner with the Spanish armies from August, 1839, to Nov., 1840. One night, during the siege of San Sebastian, he forded the river Urumea, and made a reconnaissance under the enemy's batteries. By this daring act it was made known that the river was fordable. On the outbreak of the Crimean War he embarked with the Army for the East as a Lieut.-Col. of Horse Artillery, and succeeded to the command of the whole of the Artillery (on General Cator's resignation through sickness) with the rank of Brigadier-General. On the morning of the 5th November, 1854, at the great battle of Inkerman, General Strangways was on horseback at Lord Raglan's right hand, when a shell from the enemy burst among the staff, and carried away his left leg. The shock was so great that he died about an hour afterwards. Lieut.-Col. Adye, the Assistant Adjutant-General to the Artillery, was with him when he fell, and received his last words. He was buried the following day on Cathcart's Hill, deeply lamented as a brave, chivalrous officer, and a kind friend.

1390

LIEUTENANT WILLIAM LIVINGSTONE ROBE accompanied the expedition to Gottenberg in 1807, and the same year went to Gibraltar from whence he volunteered to Portugal, and joined his father, Colonel, afterwards Sir William Robe (who was commanding the Royal Artillery) during the battle of Vimiera, the first great struggle in the Peninsula, and he was in nearly all the principal and many of the minor actions during the remaining years of that eventful war, taking part in Sir John Moore's retreat to Corunna, and being engaged at Pombal, Sabugal, Fuentes d'Onor, El Boden, Badajoz, Tarifa, Salamanca Forts, battle of Salamanca, Madrid, Burgos, Nivelles, Nive, passage of the Adour, and Bayonne. Lieut. Robe particularly distinguished himself at the battle of Nivelles, where he commanded a mountain battery of guns carried on mules. Lieut. Robe was one of the four officers of Ramsay's troop struck down at the battle of Waterloo, and he died from the effects of his wounds on the following day. He had the singular honour, as a sabalturn officer, to be mentioned for his distinguished conduct by the Duke of Wellington, and in consequence the gold medal and clasp for the battles of Nivelles and Nive was forwarded to his family after his death. There is a monument to his memory in the church at Waterloo, with the following inscription:—

He served in Syria in the campaign of 1840-41, under the command of Brigadier-General Michell, C.B. He is however chiefly remembered for his services during several years in the Royal Carriage Department, where his mechanical and scientific knowledge enabled him to make many improvements; and by the substitution of machinery for manual labour, he added greatly to the efficiency of the Department.

MAJOR EDWARD JACOB BRIDGES served with the expedition to Walcheren and present at the siege of Flushing in 1809, and in the Peninsula and France from July, 1811, to August, 1814, including the siege of Cadiz in 1811; battles of Vittoria and the Pyrenees; passage of the Bidassoa, Nivelles, Nive and Adour, and the operations before Bayonne. 1807

COLONEL CHARLES BINGHAM. Although this officer had not the good fortune to serve actively in the field, still, a few words seem due to the memory of one who during his career held some of the most important positions in the Regiment.

He was Brigade-Major at Woolwich from January, 1849, to December, 1854. Appointed Assistant - Adjutant - General in 1855, and became Deputy-Adjutant-General in 1858, on the resignation of Sir Hew Ross. He thus held important staff appointments during the critical period of the Crimean war and Indian Mutiny, and the completeness of the Artillery arrangements on both those occasions bear testimony to his ability in the higher branches of administration.

Colonel Bingham died on the 6th April, 1864, and was buried with military honours at Plumstead, H.R.H. the Duke of Cambridge attending the funeral in person.

The following General Order was issued to the Corps at his death :—

HORSE GUARDS,
11th April, 1864.

In announcing to the corps the lamented death of Colonel Charles Bingham, Deputy-Adjutant-General, Royal Artillery, the Field Marshal Commanding-in-Chief considers it due to the memory of an officer who so ably, uprightly, and zealously fulfilled the duties of a position of special trust and responsibility, to record the sense His Royal Highness entertains of the important and valuable services rendered by Colonel Bingham in that position. This can be but imperfectly conveyed in the limits of a General Order, and those to whom Colonel Bingham was known will understand how inadequate also must be the expression of His Royal Highness' regret at the loss of an officer of such tried ability, kindly disposition, & sterling worth of character and for whom the Field Marshal Commanding-in-Chief, in common with the entire corps, entertained the greatest respect and esteem.

By command of

Field Marshal H.R.H. the Duke of Cambridge,
Colonel of the Royal Artillery.

L. GARDINER,
Assist-Adjt.-General.

1846

COL. SIR GEORGE ROBERT BARKER, K.C.B., proceeded to the Crimea with the British army in 1854, and commanded a field battery at the battles of Alma and Balaclava; at the latter he was especially mentioned in despatches. He commanded the Royal Artillery with the expedition to Kertch in May, 1855, and having been promoted Regimental Lieut.-Colonel the following month, was appointed to com-

mand the batteries of the Siege Train in the left attack. He was promoted to Brevet Colonel at the fall of Sebastopol, having received a Brevet Majority and C.B. in the earlier part of the campaign.

On the outbreak of the Sepoy Mutiny in 1857, he proceeded to India, and on arrival at Calcutta was given by Sir Colin Campbell* (whose confidence and esteem he had gained in the Crimea) the command of a column which marched to the North-West Provinces. He joined the army under Sir Colin at Cawnpore, and was appointed a Brigadier to command the siege artillery proceeding to Lucknow in February, 1858. Soon after the fall of that city he succeeded to the command of the Lucknow Field Force, about 12,000 men; and in the October following marched into the Seetapore district with a portion of this Force, and defeated the rebels 5000 strong at Jamo, and subsequently took by assault after a very severe action the fortress of Birwah, one of the strongest forts in Oudh, and thus restored peace in this portion of the province. On the conclusion of the war in 1859, he returned to regimental duty, and was appointed to command the Royal Artillery in Bengal, which he held until his death at Simla, at the age of 45 years, on the 27th July, 1861. He was made a K.C.B. in 1859 for his services the previous year. Received the 5th Class Legion of Honor and 4th Class Medjidie for the Crimean war.

Sir George Barker was an Officer of great ability, knowledge, and energy of character; and invariably gained the trust and confidence of his superiors and those Officers of the army serving with him.

He served with the Royal Artillery at the capture of the islands of St. Thomas and St. Croix, in 1807; siege of Fort Desaix, Martinique; capture of Les Saintes, near Guadeloupe, and driving from the anchorage of the French fleet in 1809; and the capture of Guadeloupe and adjacent islands in 1810. He served in the Peninsula and France from July, 1813, to July, 1814, in numerous actions including the passage of the Bidassoa, Nivelle, Nive, and four days' engagements near Bayonne; passage of the Adour, investment of Bayonne, affairs at Vic Bigorre and Tarbes, passage of the Garonne, and subsequent operations to the battle of Toulouse, where he was slightly wounded. He also served in the campaign of 1815, including the battles of Quatre Bras and Waterloo, and the capture of Paris. Royal Artillery, B Brigade, R.H.A., from December, 1865, to the date of his death, which occurred at Ripon, on 28th March, 1873, aged 84 years.

1144 Sir WILLIAM MACBEAN GEORGE COLEBROOKE obtained his first commission in the Royal Artillery, in 1803, and in 1810 served as Captain in the Island of Java, where he was wounded. In 1812 he served in the same Island as Deputy-Quartermaster-General, and subsequently, in 1817 and 1818, taking part in the Mahratta War, and also in the expedition to the Persian Gulf in the latter year. From 1823 to 1831 he held the post of Commissioner of Eastern Inquiry. In 1834 he was appointed to the Governorship of the Bahama Islands, and to the Governorship of the Leeward Islands in 1837; from 1841 he held the post of Lieut.-Governor of New Brunswick down to 1848, when he was nominated Governor and Commander-in-Chief of British Guiana. His appointment, however, had scarcely been made when, in the July or August following, he was transferred to the Governorship of Barbadoes, which he held down to 1856. He was honoured with the Knighthood of the Hanoverian Order by King William in 1834, and was nominated a C.B. (Civil Division) in 1848. He died at Salt Hill, near Slough, Bucks, 6th Feb., 1870, aged 83 years.

1049 Sir HENRY LIGHT, K.C.B., entered the Army in 1799, and served in the Royal Artillery till 1824. In 1836 he was appointed Lieut.-Governor of Antigua; and in 1838 Governor and Commander-in-Chief of British Guiana, which post he held till 1848, when he retired, and was created a K.C.B. He was one of the early explorers of Egypt and Nubia, and author of "Travels in Egypt," "Views in Sicily," &c. He died at Falmouth, on the 3rd March, 1870, aged 88 years.

1516 Sir JOHN BLOOMFIELD, G.C.B., obtained the commission of 2nd Lieutenant in the Royal Artillery, April 28th, 1810, and in March, 1813, arrived in the Peninsula. He was present at the battle of Vittoria with a field battery, and at San Sebastian served in the siege batteries during both series of operations against that fortress. When Napoleon landed from Elba, and a British army was assembled in Belgium, Lieut. Bloomfield was one of that renowned host. He was young, but he had already gained the good opinion of his chiefs, and was employed at Quatre Bras and Waterloo as orderly officer to Sir George Wood, commanding the whole of Wellington's artillery. His services were reported to the Board of Ordnance, and Sir George Wood requested that should Lieut. Bloomfield at any time desire to enter the Horse Artillery, his wishes might receive favourable con-

sideration. He continued to be attached to the staff of the Artillery of the Army of Occupation for three years. In 1832, after twenty years' service, he was at length promoted to the rank of 2nd Captain, being then 39 years of age. In 1841 he was promoted to the rank of 1st Captain. In the following year, however, he joined the Horse Artillery. In 1846 he obtained, by seniority, his brevet majority, and in 1848 his Lieut.-Colonelcy. On June 20th, 1854, he became Colonel by brevet, and on Nov. 28th, of the same year, Colonel regimentally. Soon afterwards he was appointed Aide-de-Camp to the Queen. Between this time and his promotion to the rank of Major-General in 1859, he held the post of Commandant at Woolwich. He was subsequently Inspector-Gen. of Artillery. In April, 1866, he was appointed Colonel Commandant of B Brig., R.H.A., and in May, of the same year, became Lieut.-General. In 1867 he was created K.C.B., and in 1873 advanced to the dignity of G.C.B. In 1876 he became full General. Sir John was in possession of the silver war medal with six clasps and the Waterloo medal. In 1857 he was said to have married the youngest daughter of the late Mr. Longworth, of Smedley, Lancashire, the legality of which marriage, after prolonged litigation both in Ireland and Scotland, was decided against by the House of Lords in 1864. Owing to the popular feeling Major Yelverton was "suspended from all military duties" in March, 1861, after the first trial respecting his alleged marriage, and was placed on half-pay, and removed from the effective list of the regiment in May, 1861. He died at Biarritz, 1st April, 1883.

MAJOR-GENERAL W. W. BARRY, C.B., entered the army in 1846. He took part in the Crimean campaign of 1854-55, including the battles of Alma, Balaklava, and Inkerman, and the siege and fall of Sebastopol, for which services he obtained the brevet rank of Major, the medal with four clasps, the Turkish and Sardinian medals, and the 5th Class of the Medjidie. He served also

in India in 1857-8 being present at the relief of Lucknow, the battle of Cawnpore and the siege and capture of Lucknow. For these services he was twice mentioned in despatches, and received the brevet of Lieutenant Colonel. In 1860 he served with the expedition to China, and was present at Sinho, Tangku, the capture of the Taku forts, and the surrender of Peking, (mentioned in despatches, medal with two clasps.) GENERAL SIR E. SABINE, R.A., K.C.B., was born in Dublin on the 14th October, 1788. He was educated at the Royal Military Colleges of Marlow and Woolwich, and obtained his first commission on the 22nd December, 1803. At a very early period of his career his interest was enlisted in physical science, and especially in the subject of terrestrial magnetism. During the American campaign he distinguished himself by exceeding his orders, in one instance taking in the winter a 24-pound howitzer, instead of a 4-pounder, into a blockhouse which he expected to have to defend in the spring. In the spring, when the attacking force, a body of Militia, under Colonel Williamson, came within range, three or four rounds of shrapnell from the heavy gun put them to flight, and Colonel Williamson was obliged to lead his men back. The result was so brilliant that no notice was taken of his disobedience. On the conclusion of the war he was appointed, on the recommendation of the President and Council of the Royal Society, astronomer of the first expedition in search of the North West passage—viz., the expedition commanded by Sir John Ross, in 1818—and on the return of that expedition accompanied the second expedition of 1819-20, commanded by Sir Edward Parry, in the same capacity. In 1821-22 he was employed by the Government in conducting a series of pendulum experiments for determining the figure of the earth at several stations at or near the Equator on the coasts of Africa and America in the Pheasant, and in the following year (1823) he proceeded in the Griper to extend the series to Greenland, Spitzbergen, and Norway. In 1824 he was engaged in publishing the results of these experiments. In 1825 he was appointed with Sir John Herschel the British members of a Joint Commission between the French and English Governments to determine the precise difference of longitude between the observatories of Paris and Greenwich by means of rocket signals. In 1827 he was employed in determining by direct observation the difference in the length of the seconds

pendulum at Paris and Greenwich, and of the magnetic force of the earth at the same stations and in the same year he accepted the office of Secretary of the Royal Society. In 1828 and 1829 he was engaged in various scientific investigations, of which the accounts are published in the "Philosophical Transactions." In 1830, in consequence of the disturbed state of Ireland, where his company of Artillery was then serving, he was required to join it, and served partly with his regiment and partly on the General Staff of the Army in Ireland from 1833-37, when he returned to England on leave, and resumed his scientific pursuits; and in 1836 & 1837, he presented to the British Association an account of a magnetic survey of the British Islands, and a report on the variations of the magnetic force in different parts of the globe. An immediate result of his report, in 1838, was that Captain James Ross was sent in command of the Erebus and Terror to make a magnetic survey of the Antarctic regions, and to plant on his way three magnetical and meteorological observatories at St. Helena, the Cape, and Van Dieman's Land. Not only so, but this and his other valuable reports gave rise to a series of observations in all our Colonies and all over the globe as well as at home, the results of which completely changed the aspect of this department of science. In 1839 he was appointed to superintend the proceedings at the magnetic observatories established in the colonies, and to reduce and publish the results obtained at them, as well as those of a general magnetic survey of the globe, commenced at that period, under the direction of the Admiralty. In the same year he was elected General Secretary of the British Association, in 1846 Foreign Secretary of the Royal Society, and in 1850 Vice-President and Treasurer of that Society. In 1861 he became President of the Royal Society, which office he retained until 1871. Turning over the volumes of the Philosophical Transactions of sixty years ago and downwards, Sabine's name is found in company of such names as those of Wollaston, Basil Hall, John Dalton, Peter Barlow, Scoresby, Pond, the Astronomer Royal, Mr. Airy, and Mr. Owen; while his active life stretched over a period long enough to make him a cotemporary in the Royal Society's proceedings of such lights of the present day as Spottiswoode, Cayley, Huxley, Tyndall, Evans, and Stone. He died at Richmond 26th June, 1883, at the advanced age of 94.

LIEUTENANT-GENERAL SIR WILLIAM FENWICK WILLIAMS, G.C.B., of Kara, entered the Royal Artillery in 1825, becoming 1st Lieutenant in 1827, and Captain in 1840. He was employed in Turkey till 1843, and for his services there received the brevet rank of Major. Having

1726

been sent to Erzeroum to meet the Turkish and Persian Plenipotentiaries, he took part in the conferences preceding the treaty concluded there in May, 1847, and for these services obtained the brevet of Lieut.-Colonel. In June, 1848. He was appointed English Commissioner for the settlement of the Turco-Persian boundary, and was admitted a C.B. in 1852. On being nominated British Commissioner with the Turkish army in the East in August, 1854, he was promoted to the local rank of Colonel; and a few months later to that of Brigadier-General. The victory won, under his auspices, over the Russian General Mouravieff, on the heights above Kars, on the 29th of September, 1855, after the city had been invested for four months, made his name familiar throughout the world. General Williams and his brave comrades, amongst whom was the Hungarian, the late General Kmety, did all that men could do in the defence of Kars. General Mouravieff summoned the garrison to surrender on the 14th November, and General Williams, after holding a council of officers, sent a flag of truce to demand a suspension of hostilities. This medium failed through unforeseen difficulties, and General Williams having demanded an interview with General Mouravieff, accepted terms of capitulation. General Williams, on being restored to liberty, returned to England, and was rewarded with a baronetcy and a pension of £1,000 for life, the rank of K.C.B., the 1st class of the Turkish Order of the Medjidie, with the rank of Mushir, the honorary title of D.C.L., of Oxford, and the Freedom of the City of London. He was made a Grand Officer of the French Legion of Honour. He assumed the command of the troops in Canada in 1859, which post he held for some time. In August, 1870, he was appointed Governor General of Gibraltar, in place of Lieutenant-General Sir R. Airey, and this post he held till November, 1875, when he was succeeded by Lord Napier of Magdala. He was for a few weeks only, Constable of the Tower in 1881. The gallant officer retired from the army in 1877. He died in London, 26th July, 1883, aged 83 years.

1932

GENERAL JOHN TURNER, C.B., Colonel-Commandant of the Royal Artillery, entered the Royal Artillery in 1839. He was present at the re-capture of Port Natal in 1842, served in the Crimean campaign of 1854-55, commanded a troop of the Royal Horse Artillery in India in 1858-59, and a brigade in Bengal, in 1871-73. He was appointed Commandant at Woolwich in 1879. For his services in the Crimea he received the medal with three clasps, the knighthood of the Legion of Honour, the 5th Class of the Medjidie, the Turkish medal, and was nominated a C.B. He died at Farnham, 9th April, 1886.

MAJOR-GEN. W. E. M. REILLY, C.B., Inspect.-Gen. of Artillery, was gazetted to the Royal Artillery, Dec. 18th, 1845, and became a Lieutenant in April of the following year. He obtained his Captaincy in April, 1854, in which year he went to the Crimea as Aide-de-Camp to Brig.-Gen. Fox-Strangways. He served in the trenches during the winter of 1854-55, and was appointed to the siege train in February, 1855, and subsequently Brigade-Major. He was present at the bombardments of April 9th, June 6th and 17th, and September 8th. After the fall of Sebastopol he was appointed Deputy-Assist.-Qtr.-Master-General at Head Quarters (three times mentioned in despatches, medal with clasp, C.B., brevet of Major, Knight of the Legion of Honour, 5th Class of the Medjidie, and Turkish medal). He was appointed to accompany the Prussian Army in the campaign of 1866, was appointed military attaché to the French Army in 1870, and was taken prisoner at Orleans by the Germans and sent home. He also served in the Zulu war with Lord Chelmsford and General Crealock, and he filled many posts, and was much employed on important missions up to the time of his appointment to the Ordnance Department at the War Office. He died suddenly on Tuesday morning, 27th July, 1886, on board the steamer Mistletoe, during his tour of inspection of ordnance in the Channel Islands, whilst on his way from Guernsey to Alderney.

2081

FIELD-MARSHAL SIR RICHARD DACRES, entered the army December 15th, 1817, and for close on forty years saw no active service. In 1854 he proceeded as a Colonel to the Crimea, and served in the Eastern campaign of 1854-55, including the affairs of Bulganac and M'Kenzie's Farm, and battles of Alma, Balaklava, and Inkerman (horse killed). He commanded the Artillery at the repulse of the Russians in the sorties from Sebastopol on October 26th; and succeeded to the command of the Artillery at the siege of Sebastopol, after Brig.-General Strangways was killed at Inkerman, on November 5th, 1854 (medal with four clasps, K.C.B., Commander First-Class Military order of Savoy, 2nd Class of the Medjidie, and Turkish medal). He was appointed Constable of the Tower of London, July 2nd, 1881, and died at Brighton, on Monday, 6th December, 1886.

1668

GENERAL WILLIAM JAMES SMYTHE, R.A., F.R.S., was in early life very much connected with the R.A. Institution, of which he became Secretary in July, 1839, and filled that office rather more than two years, having previously served at the Cape, where he took part in the Kaffir War of 1835-6. He was next in charge of the Observatory at Longwood, St. Helena, for five years (1842-6). He left St. Helena early in January, 1847.

1844

In August, 1848, he embarked for Halifax, but returned in August, 1849, and in January following was appointed by Lord Anglesea to the newly created office of Director of Artillery Studies which he held to July, 1852. He was selected in Oct., 1854, to superintend the execution of contracts for arms in Belgium and Germany, and while still holding that appointment was appointed by Lord Panmure, Member of a Commission, issued by him in January, 1856, to consider the best mode of re-organizing the system for training officers for the scientific corps.

He was again appointed Director of Artillery Studies in 1858. He was appointed a Member of the Ordnance Select Committee in 1859.

The Duke of Newcastle, Secretary of State for the Colonies, selected him to proceed to the Fiji Islands, to enquire into the value of the group from a strategical as well as a commercial point of view.

He visited all the larger islands and found that the representations made to H.M. Government as to the value of the islands, were in many substantial particulars incorrect. He reported accordingly that he was of opinion "that it would not be expedient that Her Majesty's Government should accept the offer which has been made to cede to Her Majesty the Sovereignty over the Fiji Islands," and he had the satisfaction of seeing his report approved.

Here he made magnetical and meteorological observations from 1st January to 30th April, 1860, including very careful determination of magnetic declination, inclination and force. He was elected a Fellow of the Royal Society in 1864, and was for some years a Member of the Meteorological Committee. He was a member of the Royal Irish Academy, and of other Societies.

He lies at the foot of the Cross he erected, at Carnmoney with the simple record :—

At the foot of this Cross
Repose the Mortal Remains of
GENERAL WILLIAM JAMES SMYTH, F.R.S., M.R.I.A.,
(Royal Artillery),
Who Departed this Life, July 12th, 1887.

GENERAL JAMES FARRELL PENNY-CUICK, C.B., R.A., entered the service in May, 1847. He served in the Crimean Campaign in B Field Battery, 8th Company, 3rd Battalion, from November, 1854, including the battle of Inkerman, siege and fall of Sebastopol (Despatches, *London Gazette*, 2nd Dec., 1854), receiving the Brevet of Major, the medal with two clasps, Sardinian and Turkish medals, and the Order of the 5th Class of the Medjidie. He also served in the Indian Campaign of 1857-58, in 6th Company (Captain Middleton's), 13th Bat-

talion including the relief of Lucknow, by Lord Clyde, battle of Cawnpore on 6th Dec., actions of Seria Ghat, Chanda, and Sultanpore, siege and capture of Lucknow, and action of Barree (Despatches, *London Gazette*, 25th May and 17th July, 1858), receiving the medal with two clasps. He also took part with the Expedition to China in 1860, Commanding 8.14, and was present at Tangku, capture of Taku Forts, and surrender of Peking (mentioned in Despatches), receiving the medal with two clasps, the Brevet of Lieut.-Colonel and the C.B. He died at Bedford, on the 6th July, 1888, in his 59th year.

LIEUT.-GENERAL THE HON. E. T. GAGE, C.B., entered the army December 19th, 1844. He served in the Eastern Campaign of 1854-5, as Brigade-Major, R.A., and was present at the affair of Bulganac and McKenzie's Farm; the battles of Alma, Balaklava, and Inkerman; capture of Balaklava; siege and fall of Sebastopol (medal with four clasps, brevets of Major and Lieut.-Col., Sardinian and Turkish medals, 5th class of the Medjidie and C.B.); was also present with the Turkish Army under Omar Pasha during the operations at Rustchuk and Giurgevo in the summer of 1854, and received the gold medal for the Campaign on the Danube awarded by the Turkish Government. He died at Folkestone, on the 22nd May, 1889, aged 63 years.

2057

MAJOR-GENERAL C. B. BRACKENBURY joined the regiment in December, 1850. He served with distinction in the Crimea and was successively employed on the staff as Asst.-Instructor in Artillery at the R.M. Academy, Asst.-Director of Artillery Studies, D.-A.-A.-G. in the Intelligence Department, Superintending Officer of Garrison Instruction, Asst.-Director of Military Education, Superintendent Royal Gunpowder Factory, and Director of the Artillery College.

2291

Major-General C. B. Brackenbury's name is well known in connection with many of our most valuable works on Military Science. He died suddenly on 20th June, 1890, whilst travelling between Woolwich and London.

GENERAL A. T. PHILLPOTTS, Colonel-Commandant, R.A., a son of the late Dr. H. Phillpotts, Lord Bishop of Exeter, joined the Royal Artillery, June 21st, 1834. He served in the Crimean Campaign from June to September, 1855, including the siege and fall of Sebastopol (medal with clasp, 5th Class of the Medjidie, and Turkish medal. He also received the Syrian medal of 1841. He died at Launceston, on the 2nd September, 1890, aged 75 years.

74

MAJOR RICHARD MAITLAND became a Matross in 1732, when about 18; obtained his first commission in 1742, and then was rapidly promoted until he became Captain in 1755. He served in Flanders, and was present at Fontenoy. He was in command of one of the four companies formed for service in the East Indies in 1755; served under Lieut.-Col. Clive at the reduction of the pirates' stronghold of Gheria in February, 1756. In February, 1759, he sailed from Bombay in command of the land forces of the important expedition which captured the town and castle of Surat; for this he received the thanks of the East India Company. He died at Bombay, February, 1763. As far as is known, he was the first officer of the Royal Artillery who commanded a mixed force in the field.

209

MAJOR JAMES WOOD was sent by the Duke of Montagu to the Academy in 1745; the following year he went as a volunteer in Captain Chalmers's Company to France, and was present at the disastrous siege of L'Orient; in the same company he served at the battle of Laffelt, and returned from the Low Countries with the troops in 1748. He was made a cadet in 1754, and went to India in Major Chalmers's Company in 1755; he was present at the sieges and taking of Gheria and Surat, the siege of Vellore, the attack and taking of the Bound Hedge, and the reduction of Pondicherry. In 1765 he returned home, to find that seventeen officers originally junior to him had been promoted over his head. He was appointed Chief Firemaster in 1786, and was the inventor of several ingenious improvements in artillery. He died at Woolwich in 1797.*

433

MAJOR THOMAS ROSS. This officer is remarkable for the fact that his distinguished services were rewarded by a grant to him and to his descendants "to bear and to use for ever hereafter certain Armorial ensigns." The parchment roll, on which are inscribed by the Herald's College his services and the Arms, Crests, and Motto granted to him, is now in the R.A. Institution, Woolwich. The inscription is to the following effect. After describing his genealogical descent, it goes on to say that he, in 1756, entered into the Royal Regiment of Artillery, and served in the expedition to Bell-Isle, at the reduction of Martinico in 1762, and at that of Havannah under George, Earl of Albemarle; that on all these occasions his services were distinguished; that he received the thanks of two general officers for an attack he made from a small battery on a Spanish ship of war of 74 guns, which he set fire to and destroyed, and for several other gallant services during the siege of Moro Castle and town of Havannah; that in 1763 he served at St. Augustine, in East Florida, and in the

* Major Wood's diary is in possession of Major O. Rowe, R.A.

years 1772 and 1773 commanded a detachment in the ceded islands, with which he happily suppressed the black Charibbee Indians in the Island of St. Vincent. In 1775 his exertions helped to save the town of St. George, in the Island of Granada, from being destroyed by fire. The date of the grant of Arms was 1781; in them is shown the incident of the Spanish ship. This is believed to be one of the last grants of armorial bearings as a reward for distinguished service in the field. Captain Ross afterwards went to the East Indies, and was present at the siege of Seringapatam, presumably that of February, 1792. He died in India, in July, 1794.

COLONEL CHARLES NEWHOUSE served under General O'Hara at Toulon in 1793, commanding the British and Neapolitan Artillery there; went with the British Fleet to Hieres Bay, thence to Elba, where with two field guns he covered the attack of the troops on Calvi. He served under General Abercrombie in Egypt, was in command of the Artillery of the Reserve landed at Copenhagen in 1807.

707

CAPTAIN WILLIAM HOLCROFT served in 1798 in America, under Sir Eyre Coote, where he was taken prisoner; in Holland, 1799, under Sir R. Abercrombie; present at siege of Copenhagen under Lord Cathcart, 1807; he commanded his company in America at the battles of Queenstown, the Plains of Niagara, Stony Creek, and Niagara (December), 1813. His company, in 1816, was allowed to wear on its badges and appointments, in addition to any other badges or devices granted to the Royal Artillery, the word "Niagara," in consideration of the gallantry and good conduct shown by that company at the capture of Niagara, on 19th December, 1813, and during the whole of the subsequent campaigns in the Niagara frontier. (Colonel Duncan, in the "History of the R.A.," said that this company is now represented by No. 17, Eastern Division, R.A., but the Table of Changes of Titles shows the company to have been reduced in 1819.)

939

GENERAL F. R. CHESNEY, when a boy only nine years old, went out in 1798 on service in the field as a Sub-lieutenant of the County Down Volunteers against the United Irishmen. In 1828 he surveyed the Isthmus of Suez; and M. de Lesseps admitted that it was on the strength of Chesney's favourable reports that he first attempted the Canal, and once in Paris M. de Lesseps publicly alluded to Chesney as the "Father of the Canal." In 1831 Chesney first explored the Euphrates Valley, and he surveyed and travelled over this country again in 1833 and 1854, in command of expeditions; from the first he was a persistent advocate of the

1239

superior advantages of a railway to India by that route. In 1837 he received the gold medal of the R.G.S., but would never accept any honour or reward from Government.

1760 GENERAL W. H. ASKWITH went in January, 1838, as Military Attaché to Spain, and was for nearly three years on constant active service as British Commissioner with the Spanish Army suppressing the Carlist rebellion in Aragon and Valencia; he was present at, among others, the action of Muniesa, Miella, Segura, Utrillos, and La Scenia, being wounded at the last. Early in the Crimean War he was made Acting Inspector at the Royal Gunpowder Factory, Waltham Abbey, and became Superintendent the following year; he remained there until promoted Major-General. During nearly all his service he kept regimental records of all kinds, and after his retirement, in 1881, devoted himself to the collection of information bearing on the services of every officer who had ever served in the regiment. The results of this labour of love he handed over to the Committee R.A. Institution a short time before his death, and it is entirely through his exertions that this edition of Kane's List contains so much more information than any previous edition. For *in memoriam* memoir, see "P.R.A.I.," Vol. XXV. No. 2, pp. 97-100.

1778 MAJOR-GENERAL F. M. EARDLEY-WILMOT. In 1838, when still a subaltern, he was, by Regimental Order No. 2 of 24th February, appointed a member of a committee formed to establish a society for scientific improvement in the regiment. This society eventually became the Royal Artillery Institution. The formation of this committee was chiefly due to the exertions of Eardley-Wilmot and his friend Lefroy. In 1839 he was one of the R.A. officers selected by Sir E. Sabine to establish and conduct magnetic observatories in various parts of the world: his station was the Cape of Good Hope; while there he saw active service in the Caffre War of 1846. In January, 1847, he became Captain of the Cadet Company, and in the seven years he was at the R.M.A. he introduced a system of treating the cadets as gentlemen on their honour—a system that has survived to the present time, and one which was not found wanting when the Board of Ordnance wished to introduce espionage by sergeants, as at Sandhurst, but failed through the loyalty of the cadets thus trained by Eardley-Wilmot. During these years he acted as Secretary to the R.A.I., doing much to form it into its present shape and to get all ready for the occupation of its present home. In July, 1855, when a Lieut.-Colonel, he was appointed Superintendent of the Gun Factories in the Royal Arsenal; this was the time of the Crimean War, which brought him great

increase of work and responsibility. When Superintendent he investigated and assisted largely in the development of Mr. Bessemer's steel process. In 1875, after being C.R.A. in Canada and Commandant Shoeburyness, he was President of a committee on whose recommendation the War Office initiated Field Artillery experiments at Okehampton; so that the mounted branches of the regiment have as good reason as the R.M.A. and R.A.I. to remember the benefits conferred on them by F. M. Eardley-Wilmot.

GENERAL SIR J. H. LEFROY, with his friend Eardley-Wilmot, initiated the movement which led to the formation of the R.A.I., and was its first Secretary, from May, 1838, until in June, 1839, he was selected by Sir E. Sabine to take charge of the St. Helena Magnetic Observatory. In July, 1842, he took over the observatory at Toronto, and from October, 1843, to February, 1844, conducted meteorological observations at the west end of Lake Athabasca. These observations, made and recorded every hour of the twenty-four throughout that period, have become standards of universal reference. In 1853, on his return to England, he again became Secretary R.A.I., and as such was able to superintend the installation of books, instruments, collections, and laboratory in the building it now occupies, which was opened in February, 1854. While here he compiled and published the first "Handbook for Field Service." Late in 1854 he was appointed a "Senior Clerk" in the War Department, Whitehall, to act as confidential adviser on artillery matters to the Duke of Newcastle, and afterwards to Lord Panmure. In 1855 he was sent to the East to assist in reducing the hospital establishments, and when there secured some valuable trophies for the Rotunda Museum, notably the "Dardanelles bronze screw-gun" and the "Rhodes armour." In 1858 he drew up a paper for the Secretary of State which advocated and led to the formation of the School of Gunnery. After serving on many important committees, and being Director-General of Ordnance, Major-General Lefroy, in March, 1871, became Governor and Commander-in-Chief of the Island of Bermuda, and in October, 1880, Governor of Tasmania. He was a Fellow of the Royal Society.

MAJOR-GENERAL E. M. BOXER saw no war service; in June, 1855, was appointed Superintendent of the Laboratory, Royal Arsenal, and organized it so well that the Secretary of State declared that it was owing to Captain Boxer's efforts that the siege of Sebastopol was pushed on and the fire sustained as it was. When he left the service, in 1869, he had designed shells, cartridges, fuzes, and fittings that remained effective until the weapons for which they were invented became obsolete.

1996

GENERAL SIR E. B. HAMLEY, when still a subaltern, turned his attention to literature; his first writings were light, short stories, published in *Frazer's Magazine*. In 1851 he went to Gibraltar, on promotion, and while there became a regular contributor to *Blackwood's Magazine*, at that time the leading publication of its kind. He went to the Crimea as Adjutant to Colonel, afterwards Sir Richard, Dacres, and served through the whole campaign; there he wrote for *Blackwood* "The Campaign of Sebastopol." In 1859 he was appointed the first Professor of Military History at the newly established Staff College. In 1866 he became a Member of the Council of Military Education, about the same time as he published his great work, "The Operations of War." Its value was at once recognized and acknowledged by letters from such masters of the art as Moltke, and Generals Lee and Sherman of the United States of America. In July, 1870, Colonel Hamley became Commandant of the Staff College, and remained there

until promoted Major-General in 1877. The following year he was appointed British Commissioner for the delimitation of the Turkish and Bulgarian frontier; in 1880, British Commissioner to settle the frontier line of the Turkish Empire in Asia, under the Treaty of Berlin; and in June, 1881, British Commissioner to supervise the new boundary between Turkey and Greece on the cession of Thessaly and Epirus to the latter country. His last service in Government employment was as General Commanding the 2nd Division of the British Expeditionary Force to Egypt in 1882. In 1886 he was elected Member of Parliament for Birkenhead, and represented that constituency until his death. The diversity and brilliancy of his literary power can best be judged by a study of some of his works, so various as "Lady Lee's Widowhood," "Our Poor Relations," "Shakspeare's Funeral," "Essays on Carlyle," and the review of "Lothair," in *Blackwood's Magazine*.
